

News Release

EMBARGOED UNTIL RELEASE AT 8:30 A.M. EDT, Tuesday, March 26, 2019

BEA 19-09

Technical: Matthew von Kerczek (301) 278-9250 reis@bea.gov

David Lenze (301) 278-9292

Media: Jeannine Aversa (301) 278-9003 Jeannine.Aversa@bea.gov

State Annual Personal Income, 2018 (Preliminary) and State Quarterly Personal Income, 4th Quarter 2018

State personal income increased 4.5 percent in 2018, after increasing 4.4 percent in 2017, according to estimates released today by the Bureau of Economic Analysis (table 1). In 2018, personal income increased in all states and the District of Columbia. The percent change in personal income across all states ranged from 6.8 percent in Washington to 2.9 percent in Hawaii.

U.S. Bureau of Economic Analysis

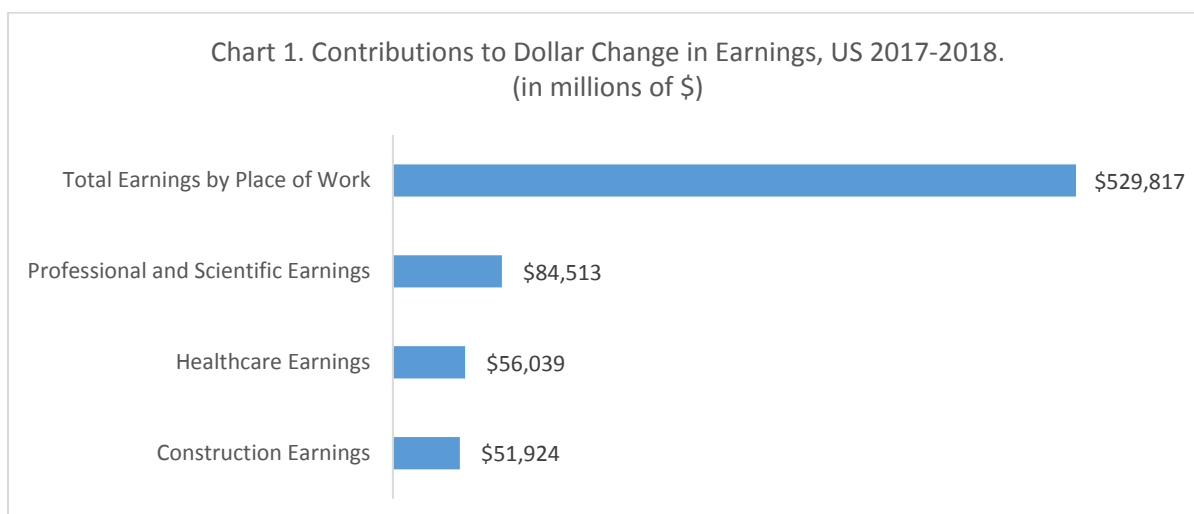

Increases in earnings, property income (dividends, interest and rent), and transfer receipts contributed to personal income growth in all states (table 2).

Earnings

Earnings increased 4.4 percent in 2018 and was the leading contributor to growth in the five fastest growing states—Washington, Utah, Nevada, Colorado, and Arizona.

- Information was the leading contributor to the earnings increase in Washington (table 3).
- Professional, scientific, and technical services was the leading contributor to the earnings increase in Utah and Colorado.
- Construction was the leading contributor to the earnings increase in Nevada and Arizona.

For the nation, earnings increased in all 24 industries for which BEA prepares estimates (table 4). Earnings growth in three industries—professional, scientific, and technical services; health care and social assistance; and construction—were the leading contributors to overall growth in personal income.

Property income (dividends, interest, and rent)

Property income increased 4.9 percent in 2018, after increasing 4.7 percent in 2017. The percent change in property income ranged from 6.0 percent in Washington and Utah, to 3.3 percent in New Mexico (table 2).

Personal current transfer receipts

Transfer receipts increased 4.2 percent for the nation in 2018, after increasing 2.9 percent in 2017. The percent change in transfer receipts ranged from 9.3 percent in Alaska to 1.7 percent in the District of Columbia.

Fourth quarter personal income

State personal income increased 5.2 percent at an annual rate in the fourth quarter of 2018, after increasing 4.4 percent in the third quarter (table 5). The percent change in personal income across all states ranged from 12.9 percent in South Dakota to 2.8 percent in New York. Earnings increased 5.1 percent nationally and was the leading contributor to growth in personal income in every state (table 6).

U.S. Bureau of Economic Analysis

Updates to Personal Income

Today, BEA also released revised quarterly estimates for 2018:Q1-2018:Q3. Updates were made to incorporate source data that are more complete and more detailed than previously available and to align the states with revised national estimates. BEA also released revised quarterly estimates of population and per capita personal income for 2010:Q1-2018:Q3, and revised annual estimates of population and per capita personal income for 2010-2017.

Next release: June 25, 2019 at 8:30 A.M. EDT
State Personal Income, First Quarter 2019

- BEA Regional Facts ([BEARFACTS](#)), a narrative summary of personal income, per capita personal income, and components of income for each state.
- Complete information on the sources and methods for the estimation of [BEA's State Personal Income and Employment](#).

Definitions

Personal income is the income received by, or on behalf of, all persons from all sources: from participation as laborers in production, from owning a home or business, from the ownership of financial assets, and from government and business in the form of transfers. It includes income from domestic sources as well as the rest of world. It does not include realized or unrealized capital gains or losses.

Per capita personal income is calculated as the total personal income of the residents of a state divided by the population of the state. In computing per capita personal income, BEA uses midquarter population estimates based on unpublished Census Bureau data.

Earnings:

Earnings by place of work is the sum of wages and salaries, supplements to wages and salaries, and proprietors' income. BEA's industry estimates are presented on an earnings by place of work basis.

Net earnings by place of residence is earnings by place of work less contributions for government social insurance, plus an adjustment to convert earnings by place of work to a place-of-residence basis. BEA presents net earnings on an all industry level.

Property income is rental income of persons, personal dividend income, and personal interest income.

Personal current transfer receipts are benefits received by persons from federal, state, and local governments and from businesses for which no current services are performed. They include retirement and disability insurance benefits (mainly Social Security), medical benefits (mainly Medicare and Medicaid), income maintenance benefits, unemployment insurance compensation, veterans' benefits, and federal education and training assistance.

Personal income is measured before the deduction of personal income taxes and other personal taxes and is reported in current dollars (no adjustment is made for price changes).

The estimate of personal income for the United States is the sum of the state estimates and the estimate for the District of Columbia; it differs slightly from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

Statistical conventions

Quarter-to-quarter percent changes are calculated from unrounded data and are annualized. Annualized growth rates show the rate of change that would have occurred had the pattern been repeated over four quarters (one year). Annualized rates of change can be calculated as follows: $((\text{level of later quarter} / \text{level of earlier quarter})^4 - 1) * 100$. Quarterly estimates are expressed at seasonally adjusted annual rates, unless otherwise specified. Quarter-to-quarter dollar changes are differences between published estimates.

BEA Regions

BEA groups all 50 states and the District of Columbia into eight distinct regions for purposes of presentation and analysis:

New England (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont)

Mideast (Delaware, District of Columbia, Maryland, New Jersey, New York, and Pennsylvania)

Great Lakes (Illinois, Indiana, Michigan, Ohio, and Wisconsin)

Plains (Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota)

Southeast (Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia)

Southwest (Arizona, New Mexico, Oklahoma, and Texas)

Rocky Mountain (Colorado, Idaho, Montana, Utah, and Wyoming)

Far West (Alaska, California, Hawaii, Nevada, Oregon, and Washington)

Uses of State Personal Income Statistics

State personal income statistics provide a framework for analyzing current economic conditions in each state and can serve as a basis for decision making. For example:

- Federal government agencies use the statistics as a basis for allocating funds and determining matching grants to states. The statistics are also used in forecasting models to project energy and water use.
- State governments use the statistics to project tax revenues and the need for public services.
- Academic regional economists use the statistics for applied research.
- Businesses, trade associations, and labor organizations use the statistics for market research.

1. Net earnings is earnings by place of work--the sum of wages and salaries, supplements to wages and salaries, and proprietors' income--less contributions for government social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

Note: Estimates may not add to totals because of rounding.

Source: U.S. Bureau of Economic Analysis

1. Percent changes are expressed at annual rates.

2. Net earnings is earnings by place of work--the sum of wages and salaries, supplements to wages and salaries, and proprietors' income--less contributions for government social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

Note: Estimates may not add to totals because of rounding.
