

News Release

EMBARGOED UNTIL RELEASE AT 8:30 A.M. EDT, THURSDAY, JULY 22, 2021

BEA 21-35

 Technical: Ryan Smith
 Media: Jeannine Aversa

 (301) 278-9246 Ryan.Smith@bea.gov
 (301) 278-9003 Jeannine.Aversa@bea.gov

Direct Investment by Country and Industry, 2020

The **U.S. direct investment abroad** position, or cumulative level of investment, increased \$244.9 billion to \$6.15 trillion at the end of 2020 from \$5.91 trillion at the end of 2019, according to statistics released by the Bureau of Economic Analysis (BEA). The increase reflected a \$158.8 billion increase in the position in Europe, primarily in the United Kingdom and the Netherlands. By industry, holding company affiliates owned by U.S. manufacturers had the largest increase.

The **foreign direct investment in the United States** position increased \$187.2 billion to \$4.63 trillion at the end of 2020 from \$4.44 trillion at the end of 2019. The increase mainly reflected a \$119.2 billion increase in the position from Europe, primarily Germany. By industry, affiliates in manufacturing, finance and insurance, and wholesale trade accounted for the majority of the increase.

U.S. direct investment abroad (tables 1 – 6)

U.S. multinational enterprises (MNEs) invest in nearly every country, but their investment in affiliates in five countries accounted for more than half of the total position at the end of 2020. The U.S. direct investment abroad position was largest in the United Kingdom (\$890.1 billion), followed by the Netherlands (\$844.0 billion) and Luxembourg (\$759.4 billion). Canada (\$422.2 billion) and Ireland (\$390.3 billion) rounded out the top-five.

By industry of the directly-owned foreign affiliate, investment was highly concentrated in holding companies, which accounted for nearly half of the overall position in 2020. Most holding company affiliates, which are owned by U.S. parents from a variety of industries, own other foreign affiliates that operate in a variety of industries. By industry of the U.S. parent, investment by manufacturing MNEs accounted for 51.6 percent of the position, followed by MNEs in finance and insurance (13.9 percent).

U.S. MNEs earned income of \$452.0 billion in 2020 on their cumulative investment abroad, a 13.0 percent decrease from 2019. Dividends, or repatriated profits, decreased \$124.6 billion, or 30.7 percent.

Foreign direct investment in the United States (tables 7 – 10)

By country of the foreign parent, five countries accounted for more than half of the total position at the end of 2020. Japan remained the top investing country at the end of 2020 with a position of \$647.7 billion. Canada (\$490.8 billion) moved up one position from 2019 to be the second largest investing country, moving the United Kingdom (\$486.9 billion) into third. The Netherlands (\$484.0 billion) and Germany (\$411.3 billion) were the fourth and fifth largest investing countries respectively at the end of 2020.

By country of the ultimate beneficial owner (UBO), Japan (\$679.0 billion) and Canada (\$569.8 billion) remained the top investing countries in terms of position at the end of 2020. Germany (\$564.3 billion) moved up one position from 2019 to be the third largest, moving the United Kingdom (\$480.8 billion) to fourth. France (\$315.0 billion) entered the top 5 investing countries at the end of 2020, moving up one position from 2019. On the UBO basis, investment from the Netherlands and Luxembourg was much lower than by the country of foreign parent, indicating that much of the investment from foreign parents in these countries was ultimately owned by investors in other countries.

Foreign direct investment in the United States was concentrated in the U.S. manufacturing sector, which accounted for 40.3 percent of the position. There was also sizable investment in finance and insurance (12.2 percent) and wholesale trade (11.1 percent).

Foreign MNEs earned income of \$151.8 billion in 2020 on their cumulative investment in the United States, a 24.1 percent decrease from 2019.

Updates to Direct Investment Statistics

BEA statistics for U.S. direct investment abroad and foreign direct investment in the United States for 2017–2019 are revised to incorporate newly available and revised source data.

Next release: July 2022
Direct Investment by Country and Industry, 2021

Additional Information

Resources

- More statistics on direct investment by country and industry are available on the [BEA website](#).
- A description of the estimation methods used to compile statistics on direct investment by country and industry is provided in [U.S. International Economic Accounts: Concepts and Methods](#).
- Stay informed about BEA developments by reading the BEA [blog](#), signing up for BEA's [email subscription service](#), or following BEA on Twitter [@BEA_News](#).
- Historical time series for these estimates can be accessed in BEA's [interactive data application](#).
- Summary data by country are available in BEA's [International Trade and Investment Country Facts](#).
- Access BEA data by registering for BEA's Data [Application Programming Interface \(API\)](#).
- Additional information on direct investment positions will be published in the August issue of the [Survey of Current Business](#).

Definitions

Direct investment is a category of cross-border investment associated with a resident in one economy having control or a significant degree of influence on the management of an enterprise resident in another economy. Ownership or control of 10 percent or more of the voting securities of an entity in another economy is the threshold for separating direct investment from other types of investment.

A **foreign affiliate** is a foreign business enterprise that is at least 10 percent owned by a single U.S. person or entity.

A **U.S. parent** is a U.S. person or entity that owns 10 percent or more of a foreign business enterprise.

A **U.S. affiliate** is a U.S. business enterprise that is at least 10 percent owned by a single foreign person or entity.

A **foreign parent** is the first person or entity outside the United States in a U.S. affiliate's ownership chain that has a direct investment interest in the affiliate.

The **ultimate beneficial owner (UBO)** is the person or entity, proceeding up a U.S. affiliate's ownership chain, beginning with the foreign parent, that is not owned more than 50 percent by another entity. The UBO ultimately owns or controls, and thus ultimately derives the benefits and assumes the risks from owning or controlling, an affiliate. The country of the UBO is often the same as that of the foreign parent, but it may be a different country or the United States.

The **direct investment position** is the value of direct investors' equity in, and net outstanding loans to, their affiliates. Changes in the position result from financial

transactions and other changes, including capital gains and losses, currency-translation adjustments, and other changes in volume and valuation, such as adjustments to book value from affiliates' current sale or purchase price.

Direct investment financial transactions are financial transactions that increase or decrease financial claims and liabilities between the parent group and their affiliates. Direct investment financial transactions consist of reinvestment of earnings, equity investment other than reinvestment of earnings, and investment in debt instruments.

Reinvestment of earnings is an affiliate's total earnings less dividends paid to its parent. It represents the part of earnings that are reinvested in the affiliate rather than repatriated to the parent.

Equity investment other than reinvestment of earnings is measured as the difference between equity increases and decreases. Equity increases are transactions that result in the parent increasing their equity interest in their affiliate. Equity decreases are transactions that result in the parent reducing their equity interest in their affiliate.

Debt instruments investment reflects parent group lending to and borrowing from their affiliates.

Income earned on direct investment includes income on equity—whether profits or losses and whether distributed or reinvested—and net interest on debt.

Statistical conventions

BEA's direct investment statistics are primarily based on data reported in the [Quarterly Survey of U.S. Direct Investment Abroad](#) (BE-577) and the [Quarterly Survey of Foreign Direct Investment in the United States](#) (BE-605). Both surveys are conducted by BEA.

The countries identified in this release reflect the location of the immediate counterpart, unless otherwise noted. The countries identified for the U.S. direct investment abroad position may not reflect the ultimate destination of the funds. Likewise, the countries identified for the foreign direct investment position in United States may not reflect the ultimate source of the funds, which is often the ultimate beneficial owner.

The direct investment positions in this release are valued at historical cost. Positions reflect the book value of direct investors' equity in, and net outstanding loans to, their affiliates. This valuation is derived principally from the accounting records of affiliates, which are primarily compiled under U.S. Generally Accepted Accounting Principles (GAAP) or International Financial Reporting

Standards (IFRS). This differs from the market value measure featured in the [U.S. net international investment position accounts](#).

This release presents statistics on a directional basis rather than the on the asset/liability basis featured in the [U.S. international transactions accounts](#) and the [U.S. net international investment position accounts](#). On a directional basis, direct investment claims and liabilities are classified according to whether the direct investor is a U.S. resident or a foreign resident. U.S. direct investment abroad occurs between a U.S. parent and its foreign affiliates. Foreign direct investment in the United States occurs between a foreign parent and its U.S. affiliates. On an asset/liability basis, direct investment statistics are organized according to whether the investment relates to an asset or liability for U.S. parents or for U.S. affiliates of foreign parents.

Related Statistics

Statistics on direct investment by country and industry are one part of a broader set of U.S. international economic accounts that, taken together, provide a comprehensive, integrated, and detailed picture of U.S. international economic activities.

Statistics on direct investment and multinational enterprises (MNEs) include annual statistics on the [activities of U.S. MNEs](#) and [U.S. affiliates of foreign MNEs](#) as well as on [new foreign direct investment in the United States](#).

The [international investment position \(IIP\) accounts](#) are released quarterly. The IIP is a statistical balance sheet that presents the dollar value of U.S. financial assets and liabilities with respect to foreign residents at a specific point in time.

The [international transactions accounts \(ITAs\)](#) are released quarterly. The ITAs are a statistical summary of economic activity between U.S. residents and the residents of other countries.

Statistics on [international services](#), released annually, include detailed annual information on trade in services and on services supplied through the channel of direct investment by affiliates of MNEs.

[U.S. international trade in goods and services](#), released by BEA and the U.S. Census Bureau, provides monthly statistics on trade in goods and services.

D Suppressed to avoid disclosure of data of individual companies.

1. The ultimate beneficial owner (UBO) is the person or entity, proceeding up a U.S. affiliate's ownership chain, beginning with the foreign parent, that is not owned more than 50 percent by another entity. The UBO ultimately owns or controls, and thus ultimately derives the benefits and assumes the risks from owning or controlling, an affiliate. The country of the UBO is often the same as that of the foreign parent, but it may be a different country or the United States.

2. The "United Kingdom Islands, Caribbean" is composed of the British Virgin Islands, Cayman Islands, Montserrat, and Turks and Caicos Islands.
