#### Personal income

In April, personal income increased, primarily reflecting increases in compensation and personal income receipts on assets that were partly offset by a decrease in proprietors' income.

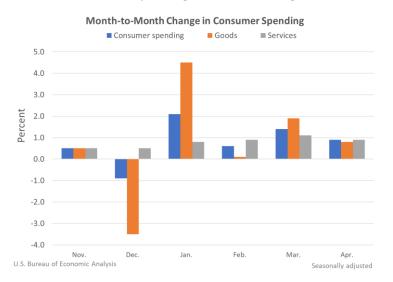

- Within compensation, the increase primarily reflected an increase in private wages and salaries, based on data from the Bureau of Labor Statistics (BLS) Current Employment Statistics. Wages and salaries of services-producing industries increased \$51.1 billion, while wages and salaries of goods-producing industries increased \$10.9 billion.
- Within income receipts on assets, dividend income increased \$16.7 billion while interest income increased \$6.3 billion.
- Proprietors' income decreased, largely reflecting a decrease in nonfarm proprietors' income.

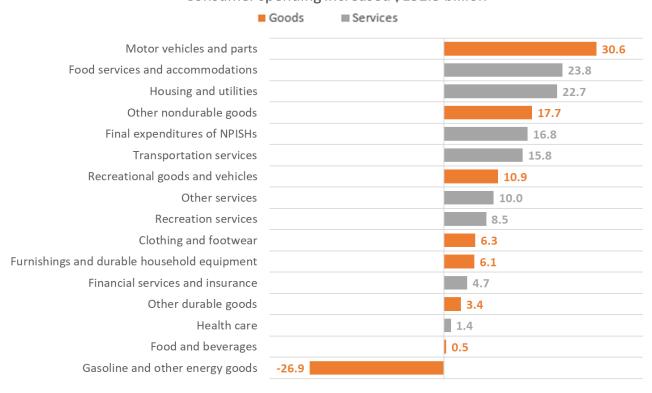

#### Consumer spending

Personal outlays increased in April, reflecting an increase in consumer spending for services and goods.

- Within services, the increase was widespread and led by food services and accommodations, based on Census Bureau Monthly Retail Trade Survey data, as well as housing and utilities, based on data from the Energy Information Administration.
- Within goods, the increase primarily reflected motor vehicles and parts (led by new motor vehicles, specifically, light trucks), based on unit sales data from Wards Intelligence. This increase was partly offset by a decrease in gasoline and other energy goods, based on data from the Energy Information Administration.
