Outdoor Recreation Satellite Account, U.S. and States, 2023

New Statistics for 2023; Updates for 2012–2022

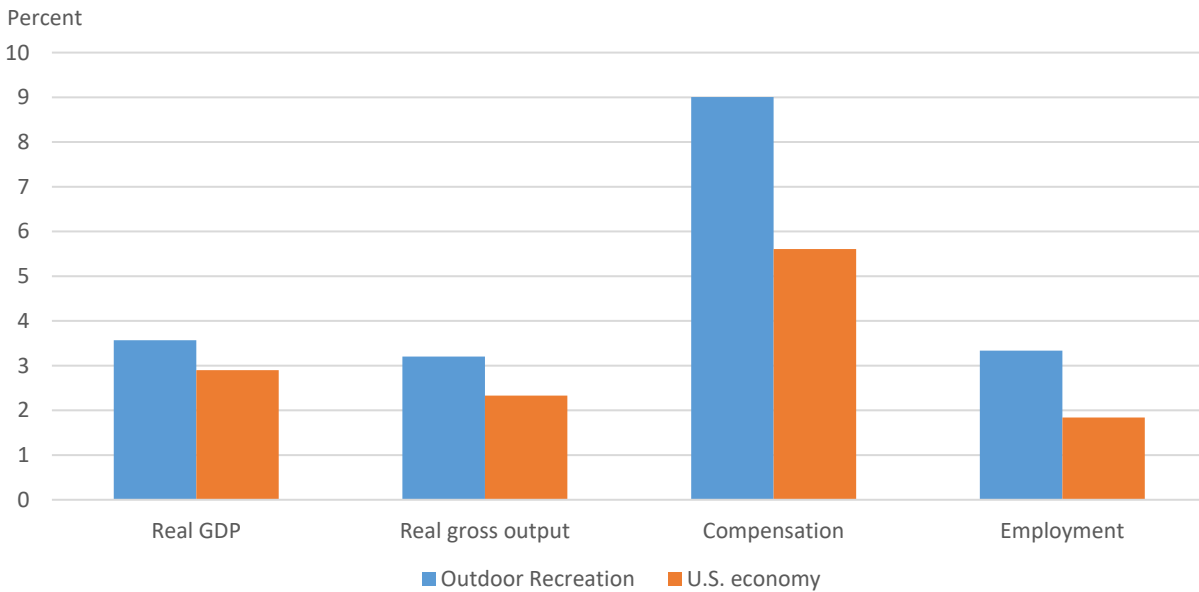

The U.S. Bureau of Economic Analysis released statistics today measuring the outdoor recreation economy for the nation, all 50 states, and the District of Columbia. The new U.S. data show that the value added of the outdoor recreation economy accounted for 2.3 percent (\$639.5 billion) of current-dollar gross domestic product (GDP) for the nation in 2023 (national table 2). At the state level, value added for outdoor recreation as a share of state GDP ranged from 6.3 percent in Hawaii to 1.6 percent in Delaware, Connecticut, and New York. The share was 0.8 percent in the District of Columbia (state table 1).

State Outdoor Recreation Value Added as a Percent of State GDP, 2023

Inflation-adjusted (“real”) GDP for the outdoor recreation economy increased 3.6 percent in 2023, compared with a 2.9 percent increase for the overall U.S. economy, reflecting a deceleration from the increase in outdoor recreation of 10.2 percent in 2022 (chart 1 and national table 1). Real gross output for the outdoor recreation economy increased 3.2 percent, while outdoor recreation compensation increased 9.0 percent, and employment increased 3.3 percent (national table 9).

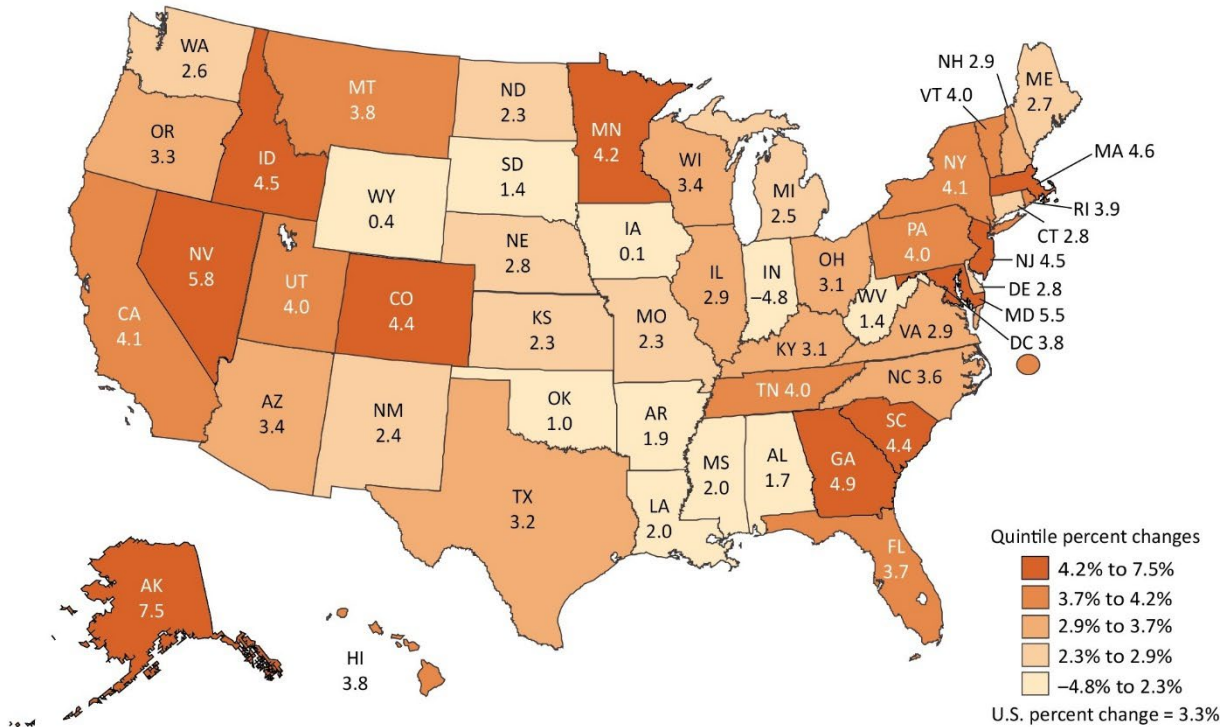

**Chart 1. Change in Outdoor Recreation,
Compared With U.S. Economy, 2023**

U.S. Bureau of Economic Analysis

Across all 50 states and the District of Columbia, outdoor recreation employment increased in 49 states and the District of Columbia in 2023, ranging from 7.5 percent in Alaska to -4.8 percent in Indiana. The percentage change was 3.8 percent in the District of Columbia ([BEA interactive tables](#)).

Change in Outdoor Recreation Employment, 2023

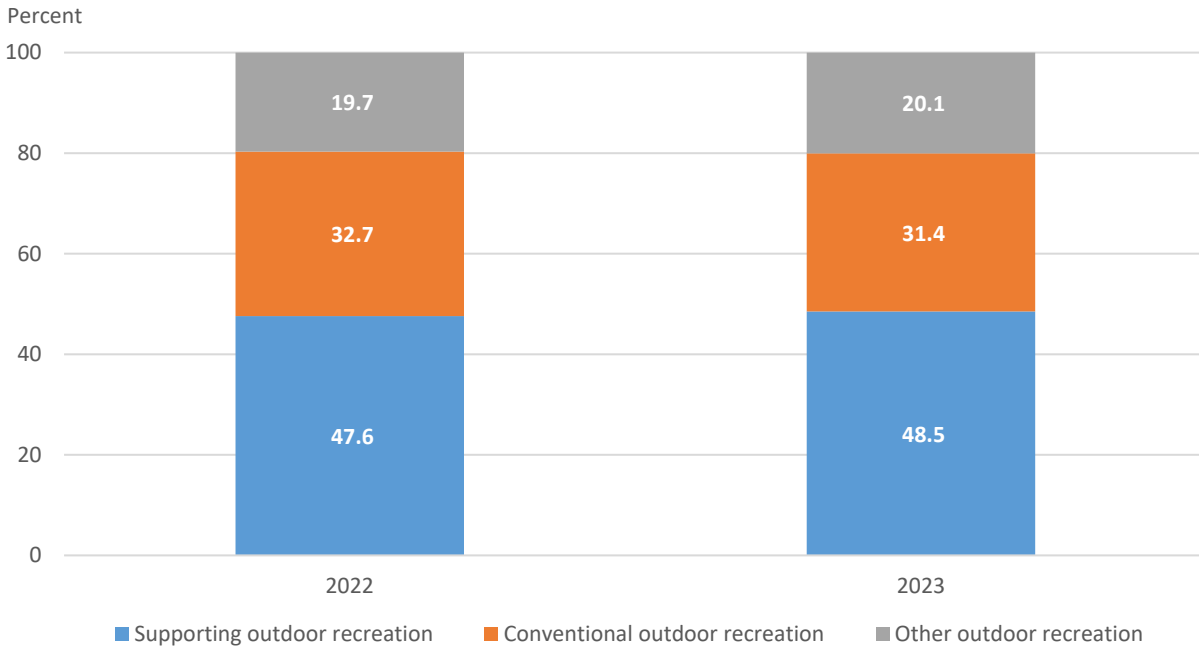

U.S. Bureau of Economic Analysis

Outdoor recreation by activity

Outdoor recreation activities fall into three general categories: (1) conventional activities such as bicycling, boating, hiking, and hunting, (2) other activities such as gardening and outdoor concerts, and (3) supporting activities such as construction, travel and tourism, local trips, and government expenditures.

In 2023, conventional outdoor recreation accounted for 31.4 percent of U.S. outdoor recreation value added, compared with 32.7 percent in 2022 (chart 2). “Other outdoor recreation” accounted for 20.1 percent of value added in 2023, compared with 19.7 percent in 2022. Supporting activities accounted for the remaining 48.5 percent of value added in 2023, compared with 47.6 percent in 2022. Growth in supporting activities was led by travel and tourism, reflecting growth in spending on transportation, hotels, and restaurants (national table 4).

**Chart 2. Outdoor Recreation by Category,
Share of Current-Dollar Value Added, 2022–2023**

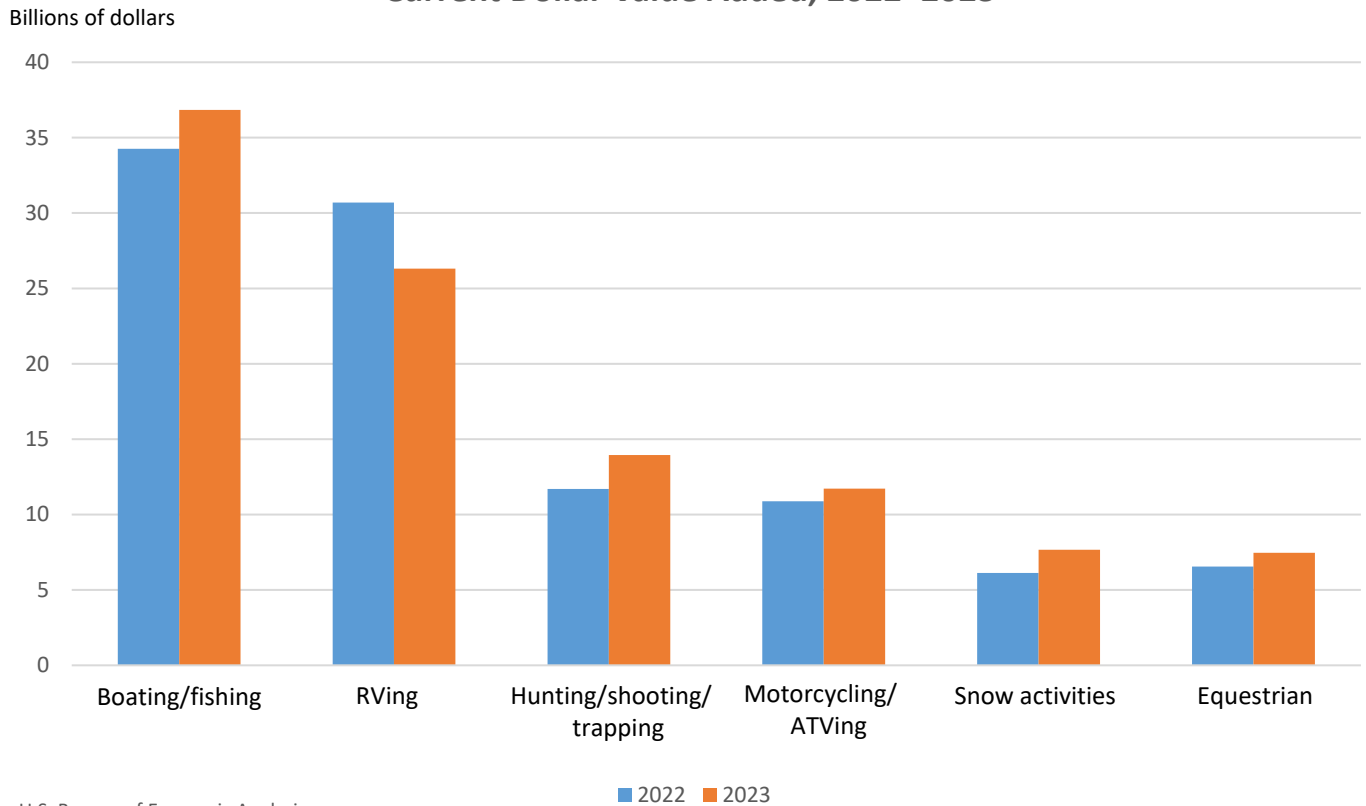

U.S. Bureau of Economic Analysis

Additional highlights for value added by activity for 2023 are as follows (chart 3 and state table 2):

- **Boating/fishing** was the largest conventional activity for the nation at \$36.8 billion in current-dollar value added and was the largest conventional activity in 34 states and the District of Columbia. The states with the largest contributions were Florida (\$4.2 billion), California (\$3.1 billion), and Texas (\$2.8 billion).
- **RVing** was the second-largest conventional activity for the nation at \$26.3 billion in current-dollar value added and was the largest conventional activity in 11 states. The states with the largest contributions were Indiana (\$4.7 billion), Texas (\$2.5 billion), and California (\$2.0 billion).
- **Hunting/shooting/trapping** was the third-largest conventional activity for the nation at \$14.0 billion in current-dollar value added and was the largest conventional activity in Wyoming. The states with the largest contributions were Texas (\$1.7 billion), California (\$705.3 million), and Florida (\$676.9 million).
- **Snow activities** for the nation was \$7.7 billion in current-dollar value added and was the largest conventional activity in three states (Colorado, Utah, and Vermont.) The states with the largest contributions were Colorado (\$1.6 billion), California (\$692.6 million), and Utah (\$643.4 million).

Chart 3. Conventional Outdoor Recreation Activities, Current Dollar Value Added, 2022–2023

U.S. Bureau of Economic Analysis

Outdoor recreation by industry

The outdoor recreation by industry data show the contributions of industries to the outdoor recreation economy, including their impact on value added, gross output, employment, and compensation.

For the nation, the **arts, entertainment, recreation, accommodation, and food services** industry group was the largest contributor to U.S. outdoor recreation current-dollar value added in 2023, accounting for \$165.2 billion, or 25.8 percent (chart 4). At the state level, arts, entertainment, recreation, accommodation, and food services was the largest contributor to outdoor recreation value added in 20 states and the District of Columbia. The states with the largest contributions were California (\$22.7 billion), Florida (\$21.2 billion), and New York (\$11.6 billion) (state table 3).

Retail trade was the second-largest industry group for the nation, at \$156.3 billion or 24.4 percent of value added, and was the largest industry group in 26 states. The states with the largest contributions were California (\$17.6 billion), Texas (\$13.9 billion), and Florida (\$12.2 billion).

Manufacturing was the third-largest industry group for the nation, at \$86.7 billion or 13.6 percent of value added, and was the largest industry group in two states (Indiana and Louisiana). The states with the largest contributions were Texas (\$12.9 billion), California (\$11.8 billion), and Indiana (\$8.1 billion).

**Chart 4. Industry Share of Outdoor Recreation,
Current-Dollar Value Added, 2023**

Outdoor recreation value added was \$639.5 billion

U.S. Bureau of Economic Analysis

Annual update of outdoor recreation satellite account

At the national level, gross output, value added, employment, and compensation now incorporate the results of the 2024 annual update of the National Economic Accounts, which includes the National Income and Product Accounts and the Industry Economic Accounts, and newly available and revised source data. The state statistics now reflect these updated national data as well as the 2024 annual update of the Regional Economic Accounts and newly available and revised regional source data.

Estimates for 2012 to 2016 now incorporate results of the 2023 comprehensive update. Previously published estimates are available on BEA's [archive page](#).

Next release: Fall 2025

Outdoor Recreation Satellite Account, U.S. and States, 2024

Note: The Outdoor Recreation Satellite Account news release will no longer include a separate “Release Highlights” document as part of the release’s “Related Materials.” Information previously included in Highlights will continue to be available in the news releases and on BEA’s website.

- Details on the preparation of BEA's national statistics are in [NIPA Handbook: Concepts and Methods of the U.S. National Income and Product Accounts](#).
- For complete information on the sources and methods used to estimate gross domestic product and personal income by state, see BEA's [gross domestic product by state](#) and [state personal income and employment](#) methodologies.

Definitions

Gross domestic product (GDP) or value added is the value of the goods and services produced by the nation's economy less the value of the goods and services used up in production. GDP is also equal to the sum of personal consumption expenditures, gross private domestic investment, net exports of goods and services, and government consumption expenditures and gross investment.

Gross output is the value of the goods and services produced by the nation's economy. It is principally measured using industry sales or receipts, including sales to final users (GDP) and sales to other industries.

Current-dollar estimates are valued in the prices of the period when the transactions occurred—that is, at “market value.” Also referred to as “nominal estimates” or as “current-price estimates.”

Chained-dollar estimates are calculated by taking the current-dollar level of a series in the base period and multiplying it by the change in the chained-type quantity index number for the series since the base period. Chained-dollar estimates correctly show growth rates for a series but are not additive in periods other than the base period.

ORSA employment consists of all full-time, part-time, and temporary wage-and-salary jobs in which the workers are engaged in the production of outdoor recreation goods and services. Self-employed individuals are excluded from employment totals.

ORSA compensation consists of the pay to employees (including wages and salaries and benefits such as employer contributions to pension and health funds) in return for their outdoor recreation-related work during a given year. Pay to the self-employed is excluded from compensation but included in value added.

ORSA value added (also referred to as GDP) consists of the value of outdoor recreation goods and services produced less the value of expenses incurred for their production. The activity of self-employed individuals is included in value added.

Geography of outdoor recreation

Outdoor recreation is measured by place of production, not residence of consumer. The value of manufactured goods, such as boats, is assigned to the state where they are produced, even if the goods are not ultimately used there. Services, such as sailing lessons, are assigned to the location where they are consumed. The value of services provided by retailers, such as boat dealers, is also assigned to the location of sale. The services of retailers (known as trade margins) are not measured by sales but are most akin to sales less the cost of goods sold. The production of imported goods is excluded from ORSA, but the value of the services of retailers selling the imported goods is included.

Outdoor recreation spending and production are allocated to states by applying state-level data to detailed, underlying national values. The underlying estimates are distributed to states before aggregation to publication levels to provide the most accurate state values possible. Statistics are primarily based on time-series data generated from the Economic Census and Quarterly Census of Employment and Wages. Additional government and nongovernment data sources are used to supplement the census data and to refine and evaluate the statistics.

1. Consists of dog mushing, sleighing, snowmobiling, snow shoeing, snow tubing.

2. Consists of air sports, driving for pleasure, geocaching/orienteering/rock hounding, ice skating, inline skating, land/sand sailing, races, running/walking/jogging, skateboarding, and wildlife watching/birding.

3. Consists of boardsailing/windsurfing, SCUBA diving, snorkeling, stand-up paddling, surfing, tubing, wakeboarding, water skiing, and whitewater rafting.

4. Consists of backpacks, bug spray, coolers, general outdoor clothing, GPS equipment, hydration equipment, lighting, sports racks, sunscreen, watches, and other miscellaneous gear and equipment.

5. Consists of agritourism, augmented reality games, beachgoing, disc golf, hot springs soaking, kite flying, model airplane/rocket/UAV, paintball, photography, stargazing/astronomy, swimming, therapeutic programs, water polo, yard sports.

6. Trip expenses less than 50 miles away from home, including food and beverages, lodging, shopping and souvenirs, and transportation.

7. Travel and tourism expenses in the Outdoor Recreation Satellite Account are consistent with the Travel and Tourism Satellite Account, which includes only expenses for travel at least 50 miles away from home.
