

News Release

EMBARGOED UNTIL RELEASE AT 8:30 AM EDT, TUESDAY, JUNE 20, 2017

BEA 17-27

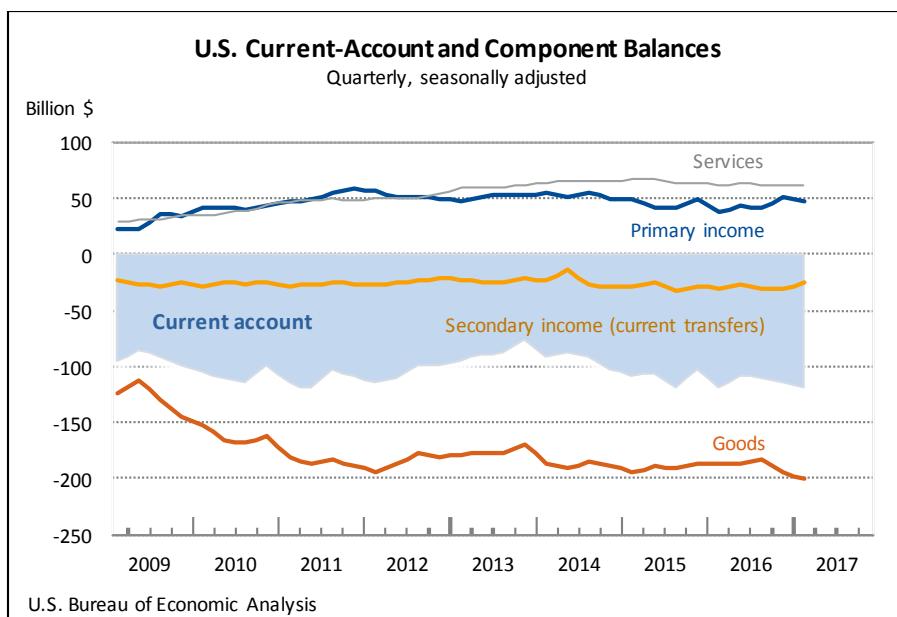

Technical: Christopher Steiner (301) 278-9492 Christopher.Steiner@bea.gov
Media: Jeannine Aversa (301) 278-9003 Jeannine.Aversa@bea.gov

ERRATA Tables 1 and 7 and relevant text in the "U.S. International Transactions: First Quarter 2017 and Annual Update" news release and corresponding statistics in the [Interactive Tables](#) were corrected on July 5, 2017. The corrections affect statistics for net U.S. incurrence of portfolio investment long-term debt liabilities and related aggregate statistics for the first quarter of 2017; related statistics for U.S. portfolio investment interest payments were not updated at this time because they were not significantly affected. Related position statistics were also corrected; see the "[U.S. Net International Investment Position: First Quarter 2017, Year 2016, and Annual Update](#)" news release.

U.S. International Transactions: First Quarter 2017 and Annual Update

Current-Account Balance

The U.S. **current-account deficit** increased to \$116.8 billion (preliminary) in the first quarter of 2017 from \$114.0 billion (revised) in the fourth quarter of 2016, according to statistics released by the Bureau of Economic Analysis (BEA). The deficit increased to 2.5 percent of current-dollar gross domestic product (GDP) from 2.4 percent in the fourth quarter.

The \$2.8 billion increase in the current-account deficit reflected a \$5.3 billion increase in the deficit on goods and a \$3.6 billion decrease in the surplus on primary income that were partly offset by a \$5.8 billion decrease in the deficit on secondary income and a \$0.3 billion increase in the surplus on services.

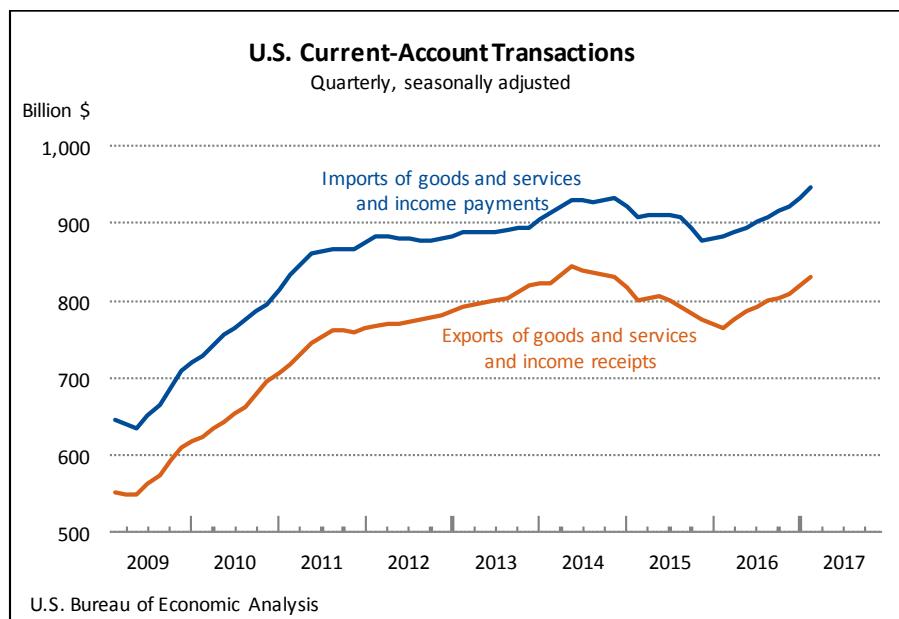

The remainder of this release highlights changes in major aggregates of the U.S. international transactions accounts and selected component contributions to those changes from the fourth quarter of 2016 to the first quarter of 2017, and highlights updates to previously published statistics.

Current-Account Transactions (tables 1-5)

Exports of goods and services and income receipts

Exports of goods and services and income receipts increased \$22.5 billion in the first quarter to \$830.3 billion.

- Goods exports increased \$13.2 billion to \$383.7 billion, mostly reflecting increases in exports of *industrial supplies and materials*, largely *petroleum and products*, and in exports of *automotive vehicles, parts, and engines*.
- Secondary income receipts increased \$4.3 billion to \$39.2 billion, largely reflecting an increase in *U.S. government transfers*, mostly fines and penalties.
- Primary income receipts increased \$3.5 billion to \$216.5 billion, reflecting increases in *other investment income* and in *direct investment income*.

Imports of goods and services and income payments

Imports of goods and services and income payments increased \$25.2 billion to \$947.1 billion.

- Goods imports increased \$18.4 billion to \$584.0 billion, mostly reflecting increases in *industrial supplies and materials*, mostly *crude oil*, in *capital goods except automotive*, and in *automotive vehicles, parts, and engines*.
- Primary income payments increased \$7.1 billion to \$168.8 billion, mostly reflecting increases in *direct investment income* and in *other investment income*, primarily *interest on loans and deposits*.

Financial Account (tables 1, 6, 7, and 8)

Net U.S. borrowing measured by financial-account transactions was \$115.3 billion in the first quarter of 2017, an increase from net borrowing of \$74.8 billion in the fourth quarter of 2016. A shift to net U.S. incurrence of *liabilities excluding financial derivatives* from fourth-quarter net U.S. repayment was partly offset by a shift to net U.S. acquisition of *financial assets excluding financial derivatives* from net U.S. liquidation.

Financial assets

Transactions in *financial assets excluding financial derivatives* shifted to net U.S. acquisition of \$282.7 billion in the first quarter from net U.S. liquidation of \$84.5 billion in the fourth quarter.

- Transactions in *other investment assets* shifted to net U.S. acquisition of \$50.9 billion in the first quarter from net liquidation of \$115.9 billion in the fourth quarter, mostly reflecting a shift to net U.S. placement of *deposits* abroad from fourth-quarter net U.S. withdrawal and a shift to net U.S. provision of *loans* to foreigners from net foreign repayment.
- Transactions in *portfolio investment assets* shifted to net U.S. purchases of \$120.3 billion in the first quarter from net sales of \$13.4 billion in the fourth quarter, mostly reflecting a shift to net purchases from net sales of *equity and investment fund shares*.
- Net U.S. acquisition of *direct investment assets* increased \$68.4 billion to \$111.7 billion in the first quarter, mostly reflecting a shift to net acquisition by U.S. parents of *debt instrument claims* on their foreign affiliates.

Liabilities

Transactions in *liabilities excluding financial derivatives* shifted to net U.S. incurrence of \$395.0 billion in the first quarter from net U.S. repayment of \$16.7 billion in the fourth quarter.

- Transactions in *other investment liabilities* shifted to net U.S. incurrence of \$149.6 billion in the first quarter from net U.S. repayment of \$96.8 billion in the fourth quarter, mostly reflecting a shift to net incurrence of *loan liabilities* from fourth-quarter repayment.

- Net U.S. incurrence of *portfolio investment liabilities* increased \$92.9 billion to \$155.3 billion, reflecting a shift to net foreign purchases of *equity and investment fund shares* from net foreign sales in the fourth quarter.
- Net U.S. incurrence of *direct investment liabilities* increased \$72.5 billion to \$90.1 billion, mostly reflecting a decrease in net repayment of U.S. parents' *debt instrument liabilities* and an increase in net incurrence of *equity liabilities*.

Financial derivatives

Transactions in *financial derivatives other than reserves* reflected first-quarter net borrowing of \$3.0 billion, a \$4.0 billion decrease from the fourth quarter.

Statistical Discrepancy (table 1)

The statistical discrepancy decreased \$37.8 billion in the first quarter to \$1.5 billion.

Updates to Fourth Quarter 2016 International Transactions Accounts Aggregates

	Billions of dollars, seasonally adjusted	<u>Preliminary estimate</u>	<u>Revised estimate</u>
Current-account balance		-112.4	-114.0
Goods balance		-196.1	-195.1
Services balance		63.8	61.0
Primary-income balance		61.5	51.3
Secondary-income balance		-41.5	-31.3
Net lending (+)/borrowing (-) from financial-account transactions		-92.0	-74.8
Statistical discrepancy		20.4	39.3

Annual Update of the International Transactions Accounts (table 9)

The statistics in this release reflect the annual update of the U.S. international transactions accounts. With this update, BEA has incorporated a new data source, an improved estimation methodology, newly available and revised source data, and updated seasonal adjustments. Key changes to the statistics are summarized below and in table 9.

- Revised statistics on secondary income reflect new data sources for estimating taxes withheld by the U.S. government and by foreign governments on exports and imports of services and receipts and payments of primary income beginning with statistics for 1999. For 1999 to 2005, revised statistics on direct investment interest income, a component of primary income, also reflect the new data source for taxes. These statistics are derived by adding an estimate of taxes to BEA's survey data on direct investment interest income, which were reported net of taxes. The new tax estimates do not affect direct investment interest income beginning with statistics for 2006 because taxes are included indistinguishably in the survey data.

- Revised statistics on direct investment income and direct investment financial transactions reflect a new method for estimating current-cost adjustments to direct investment income beginning with statistics for 1999.
- Revised statistics on primary income and financial-account transactions reflect data reported on BEA's annual direct investment surveys and Treasury International Capital (TIC) annual surveys. The annual surveys provide more comprehensive data than were available previously. The statistical periods affected by the incorporation of newly available and revised data from these and other key sources are identified in the following table.

Newly Available and Revised Source Data: Key Providers and Years Affected

Agency	Data	Years affected
BEA	Quarterly international services surveys	2014–2016
	Quarterly direct investment surveys	2014–2016
	Annual direct investment surveys	2014–2016
U.S. Census Bureau	Data on goods exports and imports	2014–2016
U.S. Customs and Border Protection	Number of foreign residents traveling in the United States	2015–2016
	Number of U.S. citizens traveling abroad	2016
U.S. Department of the Treasury	Aggregate Holdings of Long-Term Securities by U.S. and Foreign Residents	2014–2016
	Foreign-Residents' Holdings of U.S. Securities, including Selected Money Market Instruments	2015–2016
	U.S. Ownership of Foreign Securities, including Selected Money Market Instruments	2015–2016
	Reports by Financial Institutions of Liabilities to, and Claims on, Foreign Residents by U.S. Residents	2014–2016
	Reports of Liabilities to, and Claims on, Unaffiliated Foreign Residents by U.S. Resident Non-Financial Institutions	2014–2016
	Reports of Holdings of, and Transactions in, Financial Derivatives Contracts with Foreign Residents	2014–2016

A more detailed discussion of the new data sources for estimating withholding taxes and the new methodology for estimating current-cost adjustments appears in "[Preview of the 2017 Annual Update of the International Economic Accounts](#)," in the May issue of the *Survey of Current Business*. Additional information on the updates to the U.S. international transactions accounts and the U.S. international investment position accounts will be provided in the July issue of the *Survey of Current Business*.

Next release: September 19, 2017 at 8:30 A.M. EDT
U.S. International Transactions, Second Quarter 2017

- More information on these international transactions statistics will be provided next month in the [Survey of Current Business](#).
- More information on the international transactions accounts (ITAs) and a description of the estimation methods used to compile them is provided in [U.S. International Economic Accounts: Concepts and Methods](#).

Definitions

The **current account** consists of transactions between U.S. residents and nonresidents in goods, services, primary income, and secondary income.

Goods are physical items with ownership rights that can be exchanged among institutional units through transactions.

Services transactions consist of transactions arising from productive activities that change the condition of the consumer or that facilitate the exchange of products and financial assets.

Primary income transactions include investment income and compensation of employees. Investment income is the return on holdings of financial assets and includes direct investment income, portfolio investment income, other investment income, and income on reserve assets. Compensation of employees is income for the contribution of labor inputs to the production process.

Secondary income consists of current transfers between residents and nonresidents. Unlike an exchange, a transfer is a transaction in which a good, service, or asset is provided without a corresponding return of economic value. Secondary income receipts and payments include U.S. government and private transfers, such as U.S. government grants and pensions, fines and penalties, withholding taxes, personal transfers (remittances), insurance-related transfers, and other current transfers.

The **capital account** consists of capital transfers between residents and nonresidents and the cross-border acquisition and disposal of nonproduced nonfinancial assets. Capital transfers include debt forgiveness and certain disaster-related nonlife insurance claims. Nonproduced nonfinancial assets include natural resources and contracts, leases, and licenses. Capital-account transactions are distinguished from current-account transactions in that capital-account transactions result in a change in the assets of one or both parties to the transaction without affecting the income or savings of either party.

The **financial account** consists of transactions between U.S. residents and nonresidents for direct investment, portfolio investment, other investment, reserves, and financial derivatives other than reserves.

Direct investment is a category of cross-border investment associated with a resident in one economy having control or a significant degree of influence on the management of an enterprise resident in another economy. Ownership or control of 10 percent or more of the nonresident entity's voting securities is the threshold for separating direct investment from other types of investment. Direct-investment transactions include transactions in equity (including reinvestment of earnings) and debt instruments.

Portfolio investment transactions consist of cross-border transactions involving equity and investment fund shares and debt securities, excluding those included in direct investment or reserve assets.

Other investment is a residual category that includes cross-border financial instruments other than those included in direct investment, portfolio investment, financial derivatives, and reserve assets. Other-investment transactions consist of transactions in currency and deposits, loans, insurance technical reserves, trade credit and advances, and, for liabilities, special drawing rights allocations.

Reserve assets are those external assets that are readily available to and controlled by monetary authorities for meeting balance of payments financing needs, for intervention in exchange markets to affect the currency exchange rate, and for other related purposes such as maintaining confidence in the currency and the economy and serving as a basis for foreign borrowing. The major published components are monetary gold, International Monetary Fund (IMF) special drawing rights (SDRs), reserve position in the IMF, and other reserve assets.

Financial derivatives other than reserves consist of financial contracts that are linked to underlying financial instruments, commodities, or indicators. Transactions in financial derivatives consist of U.S. cash receipts and payments arising from the sale, purchase, periodic settlement, or final settlement of financial derivatives contracts. Transactions in financial derivatives are only available as a net value equal to transactions for assets less transactions for liabilities. A positive value represents net cash payments by U.S. residents to foreign residents from settlements of derivatives contracts (net lending) and a negative value represents net U.S. cash receipts (net borrowing).

The **statistical discrepancy** is the difference between net acquisition of assets and net incurrence of liabilities in the financial account (including financial derivatives) less the difference between total credits and total debits recorded in the current and capital accounts. The statistical discrepancy can also be calculated as the difference between net lending (borrowing) measured from financial-account transactions and net lending (borrowing) measured from current- and capital-account transactions.

The **current-account balance** is the difference between credits (exports and income receipts) and debits (imports and income payments) in the current account. The balance is a net measure of current-account transactions between the United States and the rest of the world. A positive balance indicates a current-account **surplus**. A negative balance indicates a current-account **deficit**.

Net lending (borrowing) measures the balance of funds supplied to the rest of the world. Net lending means that, in net terms, the U.S. economy supplies funds to the rest of the world. Net borrowing means the opposite. Net lending (borrowing) can be measured by current- and capital-account transactions or by financial-account transactions. Conceptually, the two measures are equal. In practice, the two measures differ by the statistical discrepancy.

Release and update cycle

Preliminary quarterly statistics for the ITAs are released in March, June, September, and December approximately 80 days after the end of the reference quarter. These statistics are updated the following quarter to incorporate new source data. Quarterly statistics are open for revision for at least the prior three years in annual updates released in June. Preliminary annual statistics are released in March along with statistics for the fourth quarter of the previous year. These annual statistics are open for revision for at least the prior three years in subsequent annual updates.

Related statistics

The ITAs constitute one part of a broader set of U.S. international economic accounts that, taken together, provide a comprehensive, integrated, and detailed picture of U.S. international economic activities.

The [international investment position \(IIP\) accounts](#) are released quarterly. Financial transactions that are reported in the ITAs are one type of change in position recorded in the IIP accounts.

Statistics on [direct investment and multinational enterprises](#) (MNEs) include annual statistics on the activities of MNEs, detailed annual and quarterly statistics on direct investment, and annual statistics on new investment in the United States.

Statistics on [international services](#), released annually, include detailed annual information on trade in services and on services supplied through the channel of direct investment by affiliates of MNEs.

[U.S. international trade in goods and services](#), released by BEA and the U.S. Census Bureau, provides monthly statistics on trade in goods and services.

p Preliminary r Revised n.a. Not available. (*) Transactions are between zero and +/- \$500,000

1. All travel purposes include 1) business travel, including expenditures by border, seasonal, and other short-term workers and 2) personal travel, including health-related and education-related travel.

2. Secondary income (current transfer) receipts and payments include U.S. government and private transfers, such as U.S. government grants and pensions, fines and penalties, withholding taxes, personal transfers (remittances), insurance-related transfers, and other current transfers.

3. Transactions for financial derivatives are only available as a net value equal to transactions for assets less transactions for liabilities. A positive value represents net U.S. cash payments arising from derivatives contracts, and a negative value represents net U.S. cash receipts.

4. The statistical discrepancy, which can be calculated as line 109 less line 108, is the difference between total debits and total credits recorded in the current, capital, and financial accounts. In the current and capital accounts, credits and debits are labeled in the table. In the financial account, an acquisition of an asset or a repayment of a liability is a debit, and an incurrence of a liability or a disposal of an asset is a credit.

5. Current- and capital-account statistics in the international transactions accounts differ slightly from statistics in the National Income and Product Accounts (NIPAs) because of adjustments made to convert the international transactions statistics to national economic accounting concepts. A reconciliation between annual statistics in the two sets of accounts appears in [NIPA table 4.3B](#).

6. Net lending means that U.S. residents are net suppliers of funds to foreign residents, and net borrowing means the opposite. Net lending or net borrowing can be computed from current- and capital-account transactions or from financial-account transactions. The two amounts differ by the statistical discrepancy.

Notes: Details may not add to totals because of rounding. See International Transactions Accounts table 1.3 at [www.bea.gov/itable/index_itacfm](#) for geographic detail.

p Preliminary r Revised

1. Primarily withholding taxes received and fines levied by U.S. government agencies.

2. Primarily insurance-related transfers; pensions and benefits received from Canada, Germany, and the United Kingdom; antitrust-related class-action lawsuits; and personal transfers received by U.S. residents.

3. Nonmilitary and military assistance provided to foreigners in the form of goods, services, or cash under programs enacted by the U.S. Congress.

4. Primarily U.S. government social security and retirement benefits paid to former U.S. residents who reside abroad and contributions to international organizations and commissions to meet the financial obligations of membership and to fund United Nations peacekeeping operations.

5. Personal transfers (sometimes called remittances) from U.S. resident immigrants to foreign residents.

6. Primarily insurance-related transfers; withholding taxes paid by U.S. companies; and charitable donations by U.S. entities.

Note: Details may not add to totals because of rounding.

^pPreliminary ^rRevised

1. Financial transactions on an asset/liability basis are organized according to whether the transactions relate to an asset or a liability. Net U.S. acquisition of direct investment assets relates to U.S. parent and U.S. affiliate acquisition of claims (assets). Net U.S. incurrence of direct investment liabilities relates to U.S. affiliate and U.S. parent incurrence of liabilities.

2. Financial transactions on a directional basis are organized according to whether the transactions relate to outward investment (U.S. direct investment abroad) or inward investment (foreign direct investment in the United States). Transactions for outward investment relate to transactions for U.S. parent claims and liabilities. Transactions for inward investment relate to transactions for U.S. affiliate liabilities and claims.

Note: Details may not add to totals because of rounding.
