## **U.S. International Trade in Goods and Services Annual Revision**

## Notice

### Updates to Goods and Services

In this release and in the accompanying “[U.S. International Trade in Goods and Services, April 2019](#)” release (FT-900), the U.S. Census Bureau and the U.S. Bureau of Economic Analysis (BEA) are publishing revised statistics on trade in goods and services. With these releases, statistics on trade in goods, on both a Census basis and a balance of payments (BOP) basis, and statistics on trade in services are revised beginning with 2014.

Revised seasonally adjusted statistics reflect the incorporation of recalculated seasonal and trading-day adjustments beginning with 2014. With the annual update in 2018, BEA extended the period for incorporating revised seasonal adjustments for services statistics from 3 to 5 years. With this annual update, the Census Bureau and BEA have also extended the period for incorporating revised seasonal and trading-day adjustments for goods statistics from 3 to 5 years.

In addition, revised statistics on trade in goods beginning with 2016 reflect 1) corrections and adjustments to previously published not seasonally adjusted statistics for goods on a Census basis, 2) reclassifications of several end-use commodities, and 3) newly available and revised source data on BOP adjustments, which are adjustments that BEA applies to goods on a Census basis to convert them to a BOP basis. For more information on BOP adjustments, see the “Goods (balance of payments basis)” section in the FT-900 explanatory notes.

Revised statistics on trade in services beginning with 2016 also reflect 1) newly available and revised source data, primarily from BEA’s surveys of international services transactions, and 2) revised temporal distributions of quarterly source data to monthly statistics (see the “Services” section in the FT-900 explanatory notes for more information).

On an annual basis, the goods and services deficit was revised up 0.2 percent for 2016, was revised down 0.4 percent for 2017, and was revised up 0.9 percent for 2018. The goods deficit and the services surplus were both revised down for all 3 years.

The revised statistics for goods on a BOP basis and for services will also be included in the “U.S. International Transactions, First Quarter 2019 and Annual Update” report and in the [international transactions interactive database](#), both to be released by BEA on June 20, 2019. A [preview of BEA’s 2019 annual update of the international transactions accounts](#) was published in the April 2019 *Survey of Current Business*, BEA’s monthly online journal.

(1) The petroleum products aggregated in the end-use commodity classification system include virtually the same energy-related petroleum products as those aggregated in the Standard International Trade Classification (SITC). The end-use petroleum products, however, include some products such as ethane, butane, benzene, and toluene, which are included in "Manufactured Goods" in the SITC.
