## U.S. INTERNATIONAL TRADE IN GOODS AND SERVICES

### April 2010

#### Goods and Services

The U.S. Census Bureau and the U.S. Bureau of Economic Analysis, through the Department of Commerce, announced today that total April exports of **\$148.8 billion** and imports of **\$189.1 billion** resulted in a goods and services deficit of **\$40.3 billion**, up from \$40.0 billion in March, revised. April exports were \$1.0 billion less than March exports of \$149.8 billion. April imports were \$0.8 billion less than March imports of \$189.9 billion.

In April, the goods deficit increased \$0.1 billion from March to \$52.5 billion, and the services surplus decreased \$0.1 billion to \$12.2 billion. Exports of goods decreased \$1.1 billion to \$104.0 billion, and imports of goods decreased \$1.0 billion to \$156.5 billion. Exports of services increased \$0.1 billion to \$44.8 billion, and imports of services increased \$0.2 billion to \$32.6 billion.

The goods and services deficit increased \$11.8 billion from April 2009 to April 2010. Exports were up \$24.7 billion, or 19.9 percent, and imports were up \$36.5 billion, or 23.9 percent.

#### Goods (Census basis)

The March to April decrease in exports of goods reflected decreases in *other goods* (\$0.8 billion); *consumer goods* (\$0.7 billion); and *foods, feeds, and beverages* (\$0.6 billion). Increases occurred in *industrial supplies and materials*

U.S. International Trade in Goods and Services

(\$0.6 billion) and *automotive vehicles, parts, and engines* (\$0.1 billion). *Capital goods* were virtually unchanged.

The March to April decrease in imports of goods reflected decreases in *consumer goods* (\$1.7 billion); *other goods* (\$0.5 billion); and *automotive vehicles, parts, and engines* (\$0.2 billion). Increases occurred in *capital goods* (\$1.4 billion) and *industrial supplies and materials* (\$0.1 billion). *Foods, feeds, and beverages* were virtually unchanged.

The April 2009 to April 2010 increase in exports of goods reflected increases in *industrial supplies and materials* (\$10.8 billion); *capital goods* (\$4.9 billion); *automotive vehicles, parts, and engines* (\$3.4 billion); *consumer goods* (\$1.2 billion); *other goods* (\$1.0 billion); and *foods, feeds, and beverages* (\$0.3 billion).

ii

The April 2009 to April 2010 increase in imports of goods reflected increases in *industrial supplies and materials* (\$18.2 billion); *automotive vehicles, parts, and engines* (\$6.9 billion); *capital goods* (\$6.8 billion); *consumer goods* (\$1.4 billion); and *foods, feeds, and beverages* (\$0.7 billion). A decrease occurred in *other goods* (\$0.1 billion).

## **Services**

Services exports increased \$0.1 billion from March to April. The increase was mostly accounted for by an increase in *passenger fares*. Changes in the other categories of services exports were small.

Services imports increased \$0.2 billion from March to April. The increase was mostly accounted for by increases in *other private services* (which includes items such as business, professional, and technical services, insurance services, and financial services) and *passenger fares*. Changes in the other categories of services imports were small.

Services exports increased \$3.3 billion from April 2009 to April 2010. The largest increases were in *other private services* (\$1.4 billion), *royalties and license fees* (\$0.7 billion), and *travel* (\$0.6 billion). Within *other private services*, the largest increase was in business, professional, and technical services.

Services imports increased \$2.1 billion from April 2009 to April 2010. The largest increases were in *other private services* (\$1.1 billion) and *other transportation* (\$0.5 billion), which includes freight and port services. Within *other private services*, the largest increase was in business, professional, and technical services.

## **Goods and Services Moving Average**

For the three months ending in April, exports of goods and services averaged \$147.6 billion, while imports of goods and services averaged \$187.8 billion, resulting in an average trade deficit of \$40.2 billion. For the three months ending in March, the average trade deficit was \$38.4 billion, reflecting average exports of \$146.2 billion and average imports of \$184.6 billion.

## **Selected Not Seasonally Adjusted Goods Details**

The April figures show surpluses, in billions of dollars, with Hong Kong \$1.7 (\$1.8 for March), Australia \$1.2 (\$1.2), and Belgium \$1.0 (\$0.7). Deficits were recorded, in billions of dollars, with China \$19.3 (\$16.9), OPEC \$9.3 (\$9.1), European Union \$5.7 (\$7.1), Mexico \$5.3 (\$6.0), Japan \$4.8 (\$5.3), Germany \$3.0 (\$2.7), Canada \$2.9 (\$2.2), Nigeria \$2.3 (\$2.2), Venezuela \$1.8 (\$2.3), and Ireland \$1.4 (\$2.4).

## **Trade Balances**

Advanced technology products exports were \$21.1 billion in April and imports were \$26.9 billion, resulting in a deficit of \$5.8 billion. April exports were \$2.8 billion less than the \$23.9 billion in March, while April imports were \$1.8 billion less than the \$28.7 billion in March.

## **Revisions (Goods on a Census basis, not seasonally adjusted)**

For March, goods exports were revised up \$0.2 billion and goods imports were revised down \$0.1 billion. Goods carry-over in April was \$0.1 billion (0.1 percent) for exports and \$0.5 billion (0.4 percent) for imports. For March, revised export carry-over was virtually zero. For March, revised import carry-over was \$0.2 billion (0.1 percent), revised down from \$0.7 billion (0.5 percent).

Services exports for March were revised down \$0.5 billion to \$44.7 billion. The revision was more than accounted for by downward revisions in *other transportation* and *transfers under U.S. military sales contracts*. Upward revisions in *royalties and license fees* and *other private services* were partly offsetting. Services imports for March were revised down \$0.3 billion to \$32.4 billion. The revision was more than accounted for by downward revisions in *other transportation* and *direct defense expenditures*. An upward revision in *other private services* was partly offsetting.

Goods and services exports and imports for all months through March 2010 reflect the incorporation of annual revisions to the goods and services series in the U.S. international transactions accounts. See the "Notice" in this release for a description of major revisions to goods and services exports and imports.

## NOTICE

In this release and in the accompanying “U.S. International Trade in Goods and Services: Annual Revision for 2009,” the U.S. Census Bureau and the U.S. Bureau of Economic Analysis (BEA) are jointly publishing revised statistics on both U.S. trade in goods and U.S. trade in services beginning with 1999. The revised statistics on goods and services will also be included in the annual revision of the [U.S. international transactions accounts](#) (ITAs), which BEA will release on June 17, 2010.

The annual revision has not changed the overall trend in the goods and services balance. On an annual basis, for 1999-2009, the goods and services deficit was revised one percent or less each year. Downward revisions in the goods deficit were mostly offset by downward revisions in the services surplus. The revisions in goods and services were due, in part, to the reclassification of certain transactions from services to goods, which is described below. For 2009, the goods and services deficit was revised down \$3.7 billion, or 1.0 percent.

### Goods and Services

Beginning with statistics for 1999, certain goods-related transactions previously recorded in services transactions, including fuel purchases by U.S. military agencies and by transportation carriers and equipment exported under the U.S. Foreign Military Sales program, were reclassified to goods on a balance of payments (BOP) basis. These reclassifications resulted in upward revisions to goods and offsetting downward revisions to services. For goods, the reclassifications were made through new BOP adjustments—adjustments that BEA applies to goods exports and imports on a Census basis to convert them to a BOP basis. These adjustments are combined and presented as “Net adjustments” in this report. In the ITAs, the adjustments will be distributed to the appropriate end-use commodity categories, which BEA presents in a standard table of the ITAs, [Table 2. U.S. Trade in Goods](#).

The reclassifications are part of a multi-year effort to align the ITAs with the most recent international guidelines for international economic accounts as released in 2009 in the sixth edition of the International Monetary Fund’s *Balance of Payments and International Investment Position Manual*. Additional information on BEA’s 2010 annual revision of the ITAs and plans for implementing the new international standards were presented in the May 2010 issue of the [Survey of Current Business](#).

### Goods

The 2009 not seasonally adjusted Census-basis goods statistics were revised to redistribute monthly data that arrived too late for inclusion in the month of transaction but that were included, initially, in the month in which data were received. In addition, corrections were made to previously published 2009 statistics. Seasonal and trading-day adjustments were then recomputed, and the seasonally adjusted current-dollar series were revised beginning with statistics for 2007. The chain-weighted dollar series were also revised beginning with statistics for 2007.

In addition to the new BOP adjustments described above, new BOP adjustments for exports and imports for 2007-2009 were included to phase in a revised Census methodology for low-value goods. This methodology was implemented for goods on a Census basis beginning with statistics for 2010. Also, an existing BOP adjustment for imports, which is used to reclassify transactions in repair services from goods to services, was revised to improve coverage beginning with statistics for 1999. Finally, other significant revisions to BOP adjustments, resulting from updated source data, begin with statistics for 2008.

### Services

In addition to revisions resulting from the reclassification of transactions as described above, services exports and imports were revised due to updated source data beginning with statistics for 2006. The revisions resulted largely from the incorporation of newly available and revised data from BEA quarterly services surveys and from initial results of BEA’s benchmark survey of international insurance transactions.

(1) Data are presented on a Balance of Payments (BOP) basis.

NOTES:

\* The three-month moving averages shown in this exhibit are computed by summing the subject month, the two prior months, dividing by three and showing the average at the end month of the period. A moving average is useful in smoothing the volatile trade data so that trends can better be discerned.

\* For information on data sources and methodology, see the information section on page A-1 of this release, or at [www.census.gov/ft900](http://www.census.gov/ft900) or [www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm](http://www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm).

(1) Detailed data are presented on a Census basis. The information needed to convert to a BOP basis is not available.

(2) Includes petroleum and petroleum products.

NOTE: For information on data sources, nonsampling errors and definitions, see the information section on page A-1 of this release, or at [www.census.gov/ft900](http://www.census.gov/ft900) or [www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm](http://www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm).

## Part A: Seasonally Adjusted

## Exhibit 7. Exports of Goods by End-Use Category and Commodity

In millions of dollars. Details may not equal totals due to seasonal adjustment and rounding. The commodities in this exhibit are ranked on the monthly change within each major commodity grouping. (-) Represents zero or less than one half of measurement shown.

(1) The petroleum products aggregated in the end-use commodity classification system include virtually the same energy related petroleum products as those aggregated in the SITC. The end-use petroleum products, however, include some products such as ethane, butane, benzene, and toluene which are included in "Manufactured Goods" in the SITC.

NOTE: For information on data sources, nonsampling errors, definitions and details concerning what is included in the Net Adjustments, see the information section on page A-1 of this release, or at [www.census.gov/ft900](http://www.census.gov/ft900) or [www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm](http://www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm).

## Part A: Seasonally Adjusted

**Exhibit 10. Real Exports and Imports of Goods by Principal End-Use Category**  
**2005 Chain-weighted Dollars**

In millions of dollars. The values in this exhibit are subject to periodic change, reflecting revisions to the source information for monthly deflators.

(-) Represents zero or less than one half of measurement shown.

(1) Detailed data are presented on a Census basis. The information needed to convert to a BOP basis is not available.

(2) Includes petroleum and petroleum products.

(3) The "residual" represents the difference between total Census Basis exports or imports and the sum of the components. For additional information, see [www.census.gov/foreign-trade/aip/priceadj.html](http://www.census.gov/foreign-trade/aip/priceadj.html).

NOTE: For information on data sources, nonsampling errors and definitions, see the information section on page A-1 of this release, or at [www.census.gov/ft900](http://www.census.gov/ft900) or [www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm](http://www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm).

## Part A: Seasonally Adjusted

**Exhibit 11. Real Exports, Imports, and Balance of Goods, Petroleum and Non-Petroleum End-Use Commodity Category Totals  
2005 Chain-weighted Dollars**

In millions of dollars. Details may not equal totals due to seasonal adjustment and rounding. The values in this exhibit are subject to periodic change, reflecting revisions to the source information for the monthly deflators. (-) Represents zero or less than one half of measurement shown.

Period	Balance				Exports				Imports

(1) Detailed data are presented on a Census basis. The information needed to convert to a BOP basis is not available.

(2) Includes petroleum and petroleum products.

NOTE: For information on data sources, nonsampling errors and definitions, see the information section on page A-1 of this release, or at [www.census.gov/ff900](http://www.census.gov/ff900) or [www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm](http://www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm).

## Part B: NOT Seasonally Adjusted

## Exhibit 14. Exports, Imports, and Balance of Goods By Selected Countries and Areas--2010

In millions of dollars. Details may not equal totals due to rounding. (-) Represents zero or less than one half of measurement shown.  
(X) - Not applicable.

(1) Detailed data are presented on a Census basis. The information needed to convert to a BOP basis is not available.

(2) The export totals reflect shipments of certain grains, oilseeds, and satellites that are not included in the country/area totals

## NOTES:

\* This exhibit is not additive; countries may be included in more than one area grouping. See page A-2 for a list of countries.

\* Country grouping data reflect the groups as they were at the time of reporting.

\* For information on data sources, nonsampling errors and definitions, see the information section on page A-1 of this release, or at [www.census.gov/ft900](http://www.census.gov/ft900) or [www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm](http://www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm)

## Part B: NOT Seasonally Adjusted

(1) Detailed data are presented on a Census basis. The information needed to convert to a BOP basis is not available.

(2) The export totals reflect shipments of certain grains, oilseeds, and satellites that are not included in the country/area totals.

## NOTES:

\* This exhibit is not additive; countries may be included in more than one area grouping. See page A-2 for a list of countries.

\* Country grouping data reflect the groups as they were at the time of reporting.

\* For information on data sources, nonsampling errors and definitions, see the information section on page A-1 of this release, or at [www.census.gov/ft900](http://www.census.gov/ft900) or [www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm](http://www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm).

<b>Part B: NOT Seasonally Adjusted</b>

**NOTES:**

\* Due to non-disclosure requirements, certain 10-digit Schedule B commodity classifications are subject to suppression and require a change in aggregation. As a result, Advanced Technology Product exports are overstated by \$459 million in April 2010. For additional information see [www.census.gov/ft900](http://www.census.gov/ft900).

\* Data not available on a Balance of Payments basis. For information on data sources, nonsampling errors and definitions, see the information section on page A-1 of this release, or at [www.census.gov/ft900](http://www.census.gov/ft900) or [www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm](http://www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm).

(1) Due to non-disclosure requirements, certain 10-digit Schedule B commodity classifications are subject to suppression and require a change in aggregation. As a result, Advanced Technology Product exports are overstated by \$459 million in April 2010. For additional information see [www.census.gov/ft900](http://www.census.gov/ft900).

## INFORMATION ON GOODS AND SERVICES

### GOODS (CENSUS BASIS)

The Census basis goods data are compiled from the documents collected by the U.S. Customs and Border Protection and reflect the movement of goods between foreign countries and the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and U.S. Foreign Trade Zones. They include government and non-government shipments of goods, and exclude shipments between the United States and its territories and possessions, transactions with U.S. military, diplomatic and consular installations abroad, U.S. goods returned to the United States by its Armed Forces, personal and household effects of travelers, and in-transit shipments. The General Imports value reflects the total arrival of merchandise from foreign countries that immediately enters consumption channels, warehouses, or Foreign Trade Zones.

For imports, the value reported is the U.S. Customs and Border Protection appraised value of merchandise; generally, the price paid for merchandise for export to the United States. Import duties, freight, insurance, and other charges incurred in bringing merchandise to the United States are excluded.

Exports are valued at the f.a.s. (free alongside ship) value of merchandise at the U.S. port of export, based on the transaction price including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation.

**Revision policy for goods on a Census basis:** Monthly data include actual month's transactions as well as a small number of transactions for previous months. Each month the U.S. Census Bureau revises the aggregate seasonally adjusted (current and chain-weighted dollar) and unadjusted export, import and trade balance figures, as well as the end-use totals for the prior month. SITC and country detail data are not revised monthly. The timing adjustment shown in Exhibit 14 is the difference between monthly data as originally reported and as recompiled. Quarterly revisions are made to the chain-weighted dollar series. In the last month of each quarter, the current and previous quarter are revised to incorporate the Bureau of Labor Statistics' monthly revisions to price indexes, which are used to produce the chained-dollar series and to align Census data with data published by the U.S. Bureau of Economic Analysis in the National Income and Product Accounts. Annual revisions for the months are made in June to reflect corrections received subsequent to the monthly revisions. These revisions are reflected in totals, end-use, SITC, and country summary data. The monthly end-use, commodity, and country and area data presented in Exhibits 6-18 in this release are on a Census basis.

### *U.S./CANADA DATA EXCHANGE AND SUBSTITUTION*

The data for U.S. exports to Canada are derived from import data compiled by Canada. The use of Canada's import data to produce U.S. export data requires several alignments in order to compare the two series.

1. *Coverage* - Canadian imports are based on country of origin. U.S. goods shipped from a third country are included. U.S. exports exclude these foreign shipments. For April 2010, these shipments totaled \$107.6 million. U.S. export coverage also excludes U.S. postal shipments to Canada. For April 2010, these shipments totaled \$22.0 million.

U.S. import coverage includes shipments of railcars and locomotives from Canada. Effective with January 2004 statistics, Canada excludes these shipments from its goods exports to the United States, therefore creating coverage differences between the two countries for these goods.

2. *Valuation* - Canadian imports are valued at the point of origin in the United States. However, U.S. exports are valued at the port of exit in the United States and include inland freight charges, making the U.S. export value slightly larger than the Canadian import value. Canada requires inland freight to be reported separately from the value of the goods. Combining the inland freight and the Canadian reported import value provides a consistent valuation for all U.S. exports. Inland freight charges for April 2010 accounted for 2.5 percent of the value of U.S. exports to Canada.
3. *Reexports* - Unlike Canadian imports, which are based on country of origin, U.S. exports include reexports of foreign goods. Therefore, the aggregate U.S. export figure is slightly larger than the Canadian import figure. For April 2010, reexports to Canada were \$3,273.9 million.
4. *Exchange Rate* - Average monthly exchange rates are applied to convert the published data to U.S. currency. For April 2010, the average exchange rate was 1.0052 Canadian dollars per U.S. dollar.
5. *Other* - There are other minor differences, which are statistically insignificant, such as rounding error.

**Canadian Estimates**

Effective with January 2001 statistics, the current month data for exports to Canada contain an estimate for late arrivals and corrections. The following month, this estimate is replaced, in the press release tables only, with the actual value of late receipts and corrections. This estimate improves the current month data for exports to Canada and treats late receipts for exports to Canada in a manner more consistent with the treatment of late receipts for exports to other countries.

**Nonsampling errors**

The goods data are a complete enumeration of documents collected by the U.S. Customs and Border Protection and are not subject to sampling errors. Quality assurance procedures are performed at every stage of collection, processing and tabulation; however, the data are still subject to several types of nonsampling errors. The most significant of these include reporting errors, undocumented shipments, timeliness, data capture errors, and errors in the estimation of low-valued transactions.

**Reporting Errors:** Reporting errors are mistakes or omissions made by importers, exporters or their agents in their import or export declarations. Most errors involve missing or invalid commodity classification codes and missing or incorrect quantities or shipping weights. They have a negligible effect on aggregate import, export and balance of trade statistics. However, they can affect the detailed commodity statistics.

**Undocumented Shipments:** Federal regulations require importers, exporters or their agents to report all merchandise shipments above established exemption levels. The U.S. Census Bureau has determined that not all required documents are filed, particularly for exports.

**Timeliness and Data Capture Errors:** The U.S. Census Bureau captures import and export information from administrative documents and through various automated collection programs. Documents may be lost, and data may be incorrectly keyed, coded or recorded. Transactions may be included in a subsequent month's statistics if received late.

**Low-valued Transactions:** The total values of transactions valued as much as or below \$2,500 for exports and \$2,000 (\$250 for certain quota items) for imports are estimated for each country, using factors based on the ratios of low-valued shipments to individual country totals for past periods.

The U.S. Census Bureau recommends that data users incorporate this information into their analyses, as nonsampling errors could impact the conclusion drawn from the results. For a detailed discussion of errors affecting the goods data, see "U.S. Merchandise Trade Statistics: A Quality Profile" available on the internet at [www.census.gov/foreign-trade/aip/index.html#infopapers](http://www.census.gov/foreign-trade/aip/index.html#infopapers) or from the Foreign Trade Division, U.S. Census Bureau.

**AREA GROUPINGS** (See Exhibits 14 and 14A)**North America** - Canada, Mexico

**Europe** - Albania, Andorra, Armenia, Austria, Azerbaijan, Belarus, Belgium, Bosnia-Herzegovina, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Faroe Islands, Finland, France, Georgia, Germany, Gibraltar, Greece, Hungary, Iceland, Ireland, Italy, Kazakhstan, Kosovo, Kyrgyzstan, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Malta, Moldova, Monaco, Montenegro, Netherlands, Norway, Poland, Portugal, Romania, Russia, San Marino, Serbia, Slovakia, Slovenia, Spain, Svalbard-Jan Mayen Island, Sweden, Switzerland, Tajikistan, Turkey, Turkmenistan, Ukraine, United Kingdom, Uzbekistan, Vatican City.

**European Union** - Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

**Euro Area** - Austria, Belgium, Cyprus, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Malta, Netherlands, Portugal, Slovakia, Slovenia, Spain.

**Pacific Rim** - Australia, Brunei, China, Hong Kong, Indonesia, Japan, Korea, Macao, Malaysia, New Zealand, Papua New Guinea, Philippines, Singapore, Taiwan.

**South/Central America** - Anguilla, Antigua and Barbuda, Argentina, Aruba, Bahamas, Barbados, Belize, Bermuda, Bolivia, Brazil, British Virgin Islands, Cayman Islands, Chile, Colombia, Costa Rica, Cuba, Dominica, Dominican Republic, Ecuador, El Salvador, Falkland Islands, French Guiana, Grenada, Guadeloupe, Guatemala, Guyana, Haiti, Honduras, Jamaica, Martinique, Montserrat, Netherlands Antilles, Nicaragua, Panama, Paraguay, Peru, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Suriname, Trinidad and Tobago, Turks and Caicos Islands, Uruguay, Venezuela.

**OPEC** - Algeria, Angola, Ecuador, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, United Arab Emirates, Venezuela.

**Africa** - Algeria, Angola, Benin, Botswana, British Indian Ocean Territories, Burkina, Burundi, Cameroon, Cape Verde, Central African Republic, Chad, Comoros, Congo (Brazzaville), Congo (Kinshasa), Djibouti, Egypt, Equatorial Guinea, Eritrea, Ethiopia, French Southern and Antarctic Lands, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Ivory Coast, Kenya, Lesotho, Liberia, Libya, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mayotte, Morocco, Mozambique, Namibia, Niger, Nigeria, Reunion, Rwanda, St. Helena, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, Sudan, Swaziland, Tanzania, Togo, Tunisia, Uganda, Western Sahara, Zambia, Zimbabwe.

### *Adjustments for Seasonal and Working-Day Variations*

Goods are initially classified under the Harmonized System (HS), which describes and measures the characteristics of goods traded. Combining trade into approximately 140 export and 140 import end-use categories makes it possible to examine goods according to their principal uses (See Exhibits 7 and 8). These categories are used as the basis for computing the seasonal and working-day adjusted data. These adjusted data are then summed to the six end-use aggregates for publication (Exhibit 6). These data are provided to the U.S. Bureau of Economic Analysis, from the U.S. Census Bureau, for use in the Balance of Payments and the National Income and Product Accounts.

The seasonal adjustment procedure is based on a model that estimates the monthly movements as percentages above or below the general level of each end-use commodity series (unlike other methods that redistribute the actual series values over the calendar year). Because of the extremely variable movements of the data series for aircraft, users studying data trends may wish to analyze aircraft separately from other trade.

### *Adjustments for Price Change*

Data adjusted for seasonal variation on a chained-dollar basis (2005 base year) are presented in Exhibits 10 and 11. This adjustment for price change is done using the Fisher chain-weighted methodology. The deflators are primarily based upon the monthly price indexes published by the Bureau of Labor Statistics using techniques developed for the National Income and Product Accounts by the U.S. Bureau of Economic Analysis.

### *SITC Data*

Goods data appearing in Exhibit 15 are classified in terms of the Standard International Trade Classification (SITC) Revision 3. Agricultural goods consist of non-marine food products and other products of agriculture which have not passed through complex processes of manufacture, such as raw hides and skins, fats and oils, and wine. A few goods such as essential oils, starches, casein, and albumin, considered to be agricultural by the U.S. Department of Agriculture, have been excluded from agricultural goods and are included in manufactured goods where they are classified in the SITC.

Manufactured goods conform to the SITC sections that include chemicals and related products; manufactured goods classified chiefly by material; machinery and transport equipment; miscellaneous manufactured articles; and goods and transactions not classified elsewhere.

Reexports are foreign merchandise entering the country as imports, and at the time of exportation are in substantially the same condition as when imported. Reexports, included in overall export totals, appear as separate line items in Exhibit 15.

### *Advanced Technology Products (ATP)*

About 500 of some 22,000 commodity classification codes used in reporting U.S. merchandise trade are identified as "advanced technology" codes and they meet the following criteria:

1. The code contains products whose technology is from a recognized high technology field (e.g., biotechnology).
2. These products represent leading edge technology in that field.
3. Such products constitute a significant part of all items covered in the selected classification code.

The aggregation of the goods results in a measure of advanced technology trade which appears in Exhibits 16 and 16A. This product and commodity-based measure of advanced technology differs from broader NAICS industry-based measures which include all goods produced by a particular industry group, regardless of the level of technology embodied in the goods.

### **GOODS (BALANCE OF PAYMENTS BASIS)**

Goods on a Census basis are adjusted by the U.S. Bureau of Economic Analysis (BEA) to goods on a balance of payments basis to align the data with the concepts and definitions used to prepare the international and national economic accounts. The adjustments, which are applied separately to exports and imports, are necessary to supplement coverage of the Census basis data, to eliminate duplication of transactions recorded elsewhere in the international accounts, and to value transactions according to a standard definition. The adjustments, which include both *additions* to and *deductions* from goods on a Census basis, are presented in this release as "Net Adjustments." BEA also publishes more detailed quarterly and annual statistics for Net Adjustments in a standard table of the U.S. international transactions accounts, Table 2. U.S. Trade in Goods (see the BEA Web site at [http://www.bea.gov/international/bp\\_web](http://www.bea.gov/international/bp_web) or the January, April, July, and October issues of the *Survey of Current Business*).

The export adjustments include:

**Exports under U.S. military sales contracts** - Beginning with statistics for 1999, this adjustment reflects the net amount of two separate adjustments. BEA first *deducts* goods identified in the Census data as exports under the U.S. Foreign Military Sales (FMS) program. BEA then *adds* primary source data for these exports, which are reported to BEA by the U.S. Department of Defense. For statistics prior to 1999, this adjustment reflects the *deduction* of goods exported under the FMS program because these exports are included, along with exports of services under the FMS program, in the services category "Transfers under U.S. military sales contracts."

**Gold exports, nonmonetary** - This *addition* is made for gold that is purchased by foreign official agencies from private dealers in the United States and held at the Federal Reserve Bank of New York. The Census data only include gold that leaves the U.S. customs territory.

**Goods procured in U.S. ports by foreign carriers** - Beginning with statistics for 1999, this *addition* is made for foreign air and ocean carriers' fuel purchases in U.S. ports. For statistics prior to 1999, these transactions are included in the services category "Other transportation."

**Low-value transactions** - This *addition* to statistics for 2007-2009 is made to phase in a revised Census methodology for low-value goods. The revised Census methodology was implemented for goods on a Census basis beginning with statistics for 2010.

Other adjustments to exports include:

*Deductions* for equipment repairs (parts and labor), private gift parcels, developed motion picture film, and military grant-aid. *Additions* for sales of fish caught in U.S. territorial waters, exports of electricity to Mexico, and vessels and oil rigs for which ownership changes.

The import adjustments include:

**Gold imports, nonmonetary** - This *addition* is made for gold sold by foreign official agencies to private U.S. purchasers out of stock held at the Federal Reserve Bank of New York. The Census data only include gold that enters the U.S. customs territory.

**Goods procured in foreign ports by U.S. carriers** - Beginning with statistics for 1999, this *addition* is made for U.S. air and ocean carriers' fuel purchases in foreign ports. For statistics prior to 1999, these transactions are included in the services category "Other transportation."

**Imports by U.S. military agencies** - Beginning with statistics for 1999, this adjustment reflects the net amount of two separate adjustments. BEA first *deducts* goods (petroleum and non-petroleum) identified in the Census data as imports by U.S. military agencies. BEA then *adds* primary source data for purchases of petroleum abroad by U.S. military agencies, which are reported to BEA by the U.S. Department of Defense. Non-petroleum imports are included, along with imports of services by U.S. military agencies, in the services category "Direct defense expenditures." For statistics prior to 1999, this adjustment reflects the *deduction* of goods imported by U.S. military agencies because these imports are included, along with imports of services by U.S. military agencies, in the services category "Direct defense expenditures."

**Inland freight in Canada and Mexico** - This *addition* is made for inland freight in Canada and Mexico. Imports of goods from all countries should be valued at the customs value—the value at the foreign port of export including inland freight charges. For imports from Canada and Mexico, this should be the cost of the goods at the U.S. border. However, the customs value for imports for certain Canadian and

Mexican goods is the point of origin in Canada or Mexico. BEA makes an *addition* for the inland freight charges of transporting these goods to the U.S. border to make the value comparable to the customs value reported for imports from other countries.

**Low-value transactions** - This *addition* to statistics for 2007-2009 is made to phase in a revised Census methodology for low-value goods. The revised Census methodology was implemented for goods on a Census basis beginning with statistics for 2010.

Other adjustments made to imports include:

*Deductions* for equipment repairs (parts and labor), repairs to U.S. vessels abroad, and developed motion picture film. *Additions* for non-reported imports of locomotives and railcars, imports of electricity from Mexico, conversion of vessels for commercial use, and valuation of software imports at market value.

## SERVICES

The services statistics cover transactions between foreign countries and the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and other U.S. territories and possessions. Transactions with U.S. military, diplomatic, and consular installations abroad are excluded because these installations are considered to be part of the U.S. economy.

Services statistics are based on quarterly, annual, and benchmark surveys and information obtained from monthly government and industry reports. Services are seasonally adjusted when statistically significant seasonal patterns are present. No monthly country or area detail is available due to the lack of adequate source data.

Services are shown in seven broad categories. The types of services for exports and imports are the same for six of the categories. For the seventh, the export category is "Transfers under U.S. military sales contracts" and the import category is "Direct defense expenditures." The following is a brief description of the types of services included in each category:

**Travel** - Purchases of services and goods by U.S. travelers abroad and by foreign visitors to the United States. A traveler is defined as a person who stays for a period of less than 1 year in a country of which the person is not a resident. Includes expenditures for food, lodging, recreation, gifts, and other items incidental to a foreign visit.

**Passenger fares** - Fares paid by residents of one country to transportation carriers of other countries. Receipts consist of fares received by U.S. carriers from foreign residents for travel between the United States and foreign countries and between two foreign points. Payments consist of fares paid by U.S. residents to foreign carriers for travel between the United States and foreign countries.

**Other transportation** - Beginning with statistics for 1999, includes charges for the transportation of goods by ocean, air, waterway, pipeline, and rail carriers to and from the

United States. Includes freight charges, operating expenses that transportation companies incur in foreign ports (excluding air and ocean carriers' fuel purchases in foreign ports, which are included in exports and imports of goods), and payments for vessel charter and aircraft rentals with crew. For statistics prior to 1999, also includes air and ocean carriers' fuel purchases in foreign ports.

**Royalties and license fees** - Transactions that involve intangible assets and proprietary rights such as patents, techniques, processes, formulas, designs, know-how, trademarks, copyrights, franchises, and manufacturing rights. The term "royalties" generally refers to payments for the use of copyrights or trademarks, and the term "license fees" generally refers to payments for the use of patents or industrial processes. Includes transactions with both affiliated (related parties) and unaffiliated foreign residents.

**Other private services** - Transactions consist of education services; financial services (includes fees and commissions and excludes investment income); insurance services; telecommunications services (includes transmission services and value-added services); business, professional, and technical services (includes advertising services; computer and data processing services; database and other information services; research, development, and testing services; management, consulting, and public relations services; legal services; construction services; architectural and engineering services; mining services; industrial engineering services; installation, maintenance, and repair of equipment; and medical services); and other services (includes film and tape rentals). Includes transactions with both affiliated (related parties) and unaffiliated foreign residents.

**Transfers under U.S. military sales contracts** (*Exports only*) - Beginning with statistics for 1999, includes exports of services, such as training services and repair services, provided by U.S. government military agencies through grants and the U.S. Foreign Military Sales (FMS) program; also includes exports of goods that are commingled in the source data and cannot be separately identified. Excludes exports of goods under the FMS program, which are included in exports of goods. For statistics prior to 1999, also includes exports of goods under the FMS program because they are commingled in the source data and cannot be separately identified.

**Direct defense expenditures** (*Imports only*) - Beginning with statistics for 1999, includes expenditures by U.S. military agencies abroad, including expenditures by U.S. personnel, payments of wages to foreign residents, construction expenditures, payments for foreign contractual services, and procurement of foreign goods (excluding petroleum purchases abroad, which are included in imports of goods). For statistics prior to 1999, also includes petroleum purchases abroad by U.S. military agencies.

**U.S. government miscellaneous services** - Transactions of U.S. government nonmilitary agencies with foreign residents. Most of these transactions involve the provision

of services to, or purchases of services from, foreigners; transfers of some goods are also included.

**Revision policy for goods on a balance of payments basis and for services:**

Each month, a preliminary estimate for the current month and a revised estimate for the immediately preceding month are released. After the initial revision, no further revisions are made to a month until more complete source data become available in March,

June, September, and December. The releases in March, June, September, and December contain revised estimates for the previous six months. The release in March also contains revisions for all months of the previous year in order to align the seasonally adjusted monthly data with annual totals. The release in June contains annual revisions, which reflect updated source data, changes in definitions and classifications, and changes in estimating methodologies.

**MONTHLY RELEASE SCHEDULE**

Month	Date	Day
Nov	01-12-10	Tuesday
Dec	02-10-10	Wednesday
Jan	03-11-10	Thursday
Feb	04-13-10	Tuesday
Mar	05-12-10	Wednesday
Apr	06-10-10	Thursday
May	07-13-10	Tuesday
Jun	08-11-10	Wednesday
Jul	09-09-10	Thursday
Aug	10-14-10	Thursday
Sep	11-10-10	Wednesday
Oct	12-10-10	Friday

**U.S. INTERNATIONAL TRANSACTIONS ACCOUNTS**

Quarterly and annual estimates of goods on a balance of payments basis and services are included in the U.S. international transactions accounts, which are published in news releases in March, June, September, and December and in the Survey of Current Business in the January, April, July, and October issues. The next release of the international transactions accounts is scheduled for June 17, 2010. The Survey is available online at [www.bea.gov/scb/index.htm](http://www.bea.gov/scb/index.htm) or from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

**ELECTRONIC AVAILABILITY**

The FT-900 and supplement are available on the following:

**INTERNET** The U.S. International Trade in Goods and Services reports are available at: [www.census.gov/ft900](http://www.census.gov/ft900) or [www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm](http://www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm).

**STAT-USA** The U.S. Department of Commerce's electronic information facility. Call 1 800 STAT-USA for product information.

Additional data and information on goods can be obtained from: **Foreign Trade Division, U.S. Census Bureau, Washington, D.C. 20233**

Additional data and information on services can be obtained from: **Balance of Payments Division, U.S. Bureau of Economic Analysis, Washington, D.C. 20230**

(1) Includes agricultural, forestry, fishery products, mineral commodities, scrap, waste and used or second-hand merchandise. The state of origin of movement value totals for non-manufactured commodities usually reflect the state where the U.S. port of export is located.

(2) Includes prior month's revision to exports to Canada.

**Exhibit 2a. U. S. General Imports of Goods by State, State of Destination, by NAICS-Based Product Code Groupings, Not Seasonally Adjusted: 2010**

In millions of dollars. Foreign Trade Zone (FTZ) shipments are included in the U. S. total and distributed among individual states and territories. Separate FTZ total line is for reference only. Details may not equal totals due to rounding. (X) Not applicable. (-) Represents zero or less than one-half unit of measurement shown.
