BEA 11-12

**STATE PERSONAL INCOME 2010**

State personal income rose an average 3.0 percent in 2010 after falling 1.7 percent in 2009, according to estimates released today by the U.S. Bureau of Economic Analysis. State personal income growth ranged from 0.3 percent in Nevada to 4.2 percent in New Mexico. Inflation, as measured by the national price index for personal consumption expenditures, increased to 1.7 percent in 2010 from 0.2 percent in 2009.

This news release is available on BEA's Web site at [www.bea.gov/newsreleases/rels.htm](http://www.bea.gov/newsreleases/rels.htm).

All three major components of personal income (earnings, property income, and personal current transfer receipts) grew in 2010. In 2009 only transfers grew as lower employment reduced earnings and lower interest rates and profits reduced property income (dividends, interest, and rent). The 7.6 percent growth of transfer receipts in 2010 was larger than the 2.4 percent growth of earnings and the 0.6 percent growth of property income.

Earnings in 10 states (Arkansas, Kentucky, Louisiana, Maryland, New Mexico, North Dakota, Pennsylvania, Vermont, Virginia, and West Virginia) rebounded in 2010 above their previous peaks after falling in the recession. Earnings in these states grew 2.9 percent on average in 2010 having declined 1.5 percent 2009. Earnings in Alaska, the only state to avoid a decline in 2009, grew 3.2 percent in 2010 up from 2.4 percent in 2009. Earnings in the other states rose 2.3 percent in 2010, following a 4.5 percent decline in 2009.

Professional services is the only industry (of those which declined) to recover from the earnings downturn. Even so, 2010 earnings in professional services are just 0.2 percent higher than before the decline. Earnings in 14 industries (including manufacturing and finance) grew in 2010 but remain below 2008 (or earlier) peaks. Two industries, construction and real estate, continued to decline in 2010. The 4.8 percent decline in construction brought earnings in that industry to its lowest level since 2001 and the 2.3 percent decline in real estate brought its earnings to the lowest level since 2000. The other industries (including educational services, health care, and government) grew in both 2009 and 2010. Growth accelerated in 2010 in educational services and health care and slowed in government.

Health care increased its share of earnings to 11.2 percent in 2010 up from 11.0 percent in the previous year. Health care overtook manufacturing as the largest private industry in 2009 as it continued to expand through the recession while manufacturing earnings declined. The 2.7 percent increase in manufacturing earnings in 2010 kept its share steady at 10.2 percent.

**Fourth quarter personal income.**<sup>1</sup> State personal income growth averaged 0.9 percent in the fourth quarter of 2010, a small acceleration from the 0.6 percent growth in the third quarter. Fourth quarter growth ranged from 0.5 percent in Maine to 2.3 percent in South Dakota. The inflation rate rose to 0.5 percent in the fourth quarter of 2010 from 0.2 percent in the third quarter.

Real estate earnings grew faster than every other nonfarm industry in the fourth quarter. Its 7.0 percent growth was the largest since the first quarter of 1998 but still leaves earnings 20 percent below its peak in the third quarter of 2005. Almost all of the increase was in the proprietors' income component (received by the owners of unincorporated businesses); wages and salaries in the industry barely changed.

---

<sup>1</sup>NOTE.—Quarter-to-quarter percent changes are calculated from unrounded data. They are seasonally adjusted but not annualized.

## Definitions

**Personal income** is the income received by all persons from all sources. Personal income is the sum of net earnings by place of residence, property income, and personal current transfer receipts. **Property income** is rental income of persons, personal dividend income, and personal interest income. **Net earnings** is earnings by place of work (the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income) less contributions for government social insurance, plus an adjustment to convert earnings by place of work to a place-of-residence basis. Personal income is measured before the deduction of personal income taxes and other personal taxes and is reported in current dollars (no adjustment is made for price changes).

The estimate of personal income in the United States is derived as the sum of the state estimates and the estimate for the District of Columbia; it differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

BEA groups all 50 states and the District of Columbia into eight distinct regions for purposes of data collection and analysis: **New England** (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont); **Mideast** (Delaware, District of Columbia, Maryland, New Jersey, New York, and Pennsylvania); **Great Lakes** (Illinois, Indiana, Michigan, Ohio, and Wisconsin); **Plains** (Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota); **Southeast** (Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia); **Southwest** (Arizona, New Mexico, Oklahoma, and Texas); **Rocky Mountain** (Colorado, Idaho, Montana, Utah, and Wyoming); and **Far West** (Alaska, California, Hawaii, Nevada, Oregon, and Washington).

BEA's national, international, regional, and industry statistics; the *Survey of Current Business*; and BEA news releases are available without charge on BEA's Web site at [www.bea.gov](http://www.bea.gov). <sup>r</sup> revised

<sup>p</sup> preliminary

1. Per capita personal income (PCPI) estimates for 2010 were calculated using the April 1, 2010 decennial census population counts that were released by the Census Bureau in December 2010. Revised estimates of PCPI for 2001-2009 are not published because intercensal state population estimates consistent with the 2000 and 2010 decennial census counts are not currently available.

1. Net earnings is earnings by place of work--the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income--less contributions for government social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

Note: Estimates may not add to totals because of rounding.

Source: U.S. Bureau of Economic Analysis

**Table 3. Contributions to Percent Change in Personal Income, by State and Region, 2009-2010/1**

[Percentage points, seasonally adjusted]

	Percent change in personal income	Net earnings							Personal current transfer receipts	
		Earnings by place of work					Residence adjustment	Dividends, interest, and rent	Excluding state unemployment insurance	State unemployment insurance
		Wage and salary disbursements	Employer contributions for		Proprietors' income	Contributions for government social insurance				
Employee pension and insurance funds	Government social insurance

1. Net earnings is earnings by place of work--the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income--less contributions for government social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

Note: Estimates may not add to totals because of rounding.

Source: U.S. Bureau of Economic Analysis
